I. PREFACE

This is the twenty-third edition of the Delaware Nursing Home Utilization Statistical Report. The report presents characteristics of Delaware's nursing homes and their patients. The data in this report does not include Intermediate Care Facilities for the Mentally Retarded (ICFMR). ICFMR facilities provide active treatment services to people with mental retardation and other related conditions causing adaptive behavior similar to that of the mentally retarded person which manifests before the person reaches the age of 22. Also, the report does not include data from facilities that serve the population under 18.

The Bureau of Health Planning & Resource Management has contracted with the University of Delaware's Center for Applied Demography & Survey Research to collect the data, provide data entry and verification services along with data tabulation and analysis.

The source of information for year 2008 encompassed in this document is monthly utilization statistical reports by Delaware nursing homes submitted to the University of Delaware's Center for Applied Demography & Survey Research. The center obtained a list of licensed nursing facilities at the beginning of the year from the Bureau of Health Planning & Resource Management. All changes to the list of licensed facilities, including name changes and changes in the number of licensed beds were communicated to the center by the bureau. Facilities were contacted on a monthly basis with requests sent the first day of the month. A combination of methods was used to contact the facilities on the list. The initial method was standard mail, followed up by e-mail, fax, phone follow-ups, and in some cases registered mail. Using these methods, the center achieved full compliance from all facilities for all 12 months. When reports were received from individual facilities, the reports were checked for internal inconsistencies or unexpected changes in reported statistics. These discrepancies were immediately communicated back to the facilities with explanation and a request to update the data. Once an updated report was received by the center, the data was keyed into a database using a double entry system. Once the data was keyed, it was then verified. At the end of the reporting year, the data was recoded as needed and tabulated.

This report presents the collected data in two sections. The Facility Characteristics section of this report focuses on data from 1998 through 2008. Most of the summary presented here focuses on aggregated data for all nursing homes in Delaware, particularly:

- (1) Facility characteristics (number of homes and beds by ownership)
- (2) Utilization data (patient days, occupancy, admissions and discharges)
- (3) Patient characteristics (age, gender and source of payment)

The section entitled Tables presents summary characteristics such as total patient days, occupancy rate, and patients by source of payment, along with number of admissions and discharges for each facility.

Note:

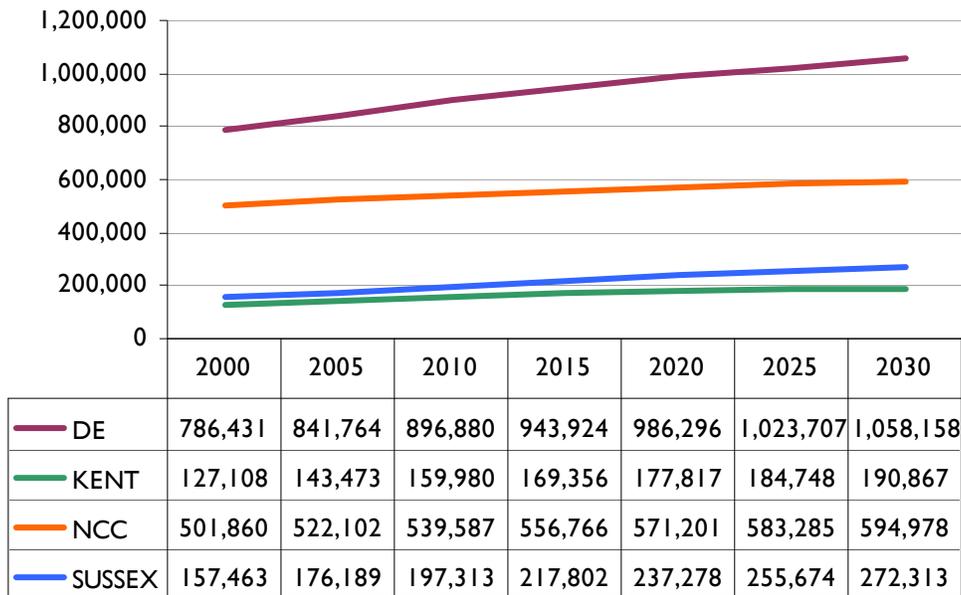

Percentages in the report may not add up to 100% due to rounding.

When making year to year comparisons, refer to Appendix A for changes in facility names and/or number of licensed beds.

STATE POPULATION

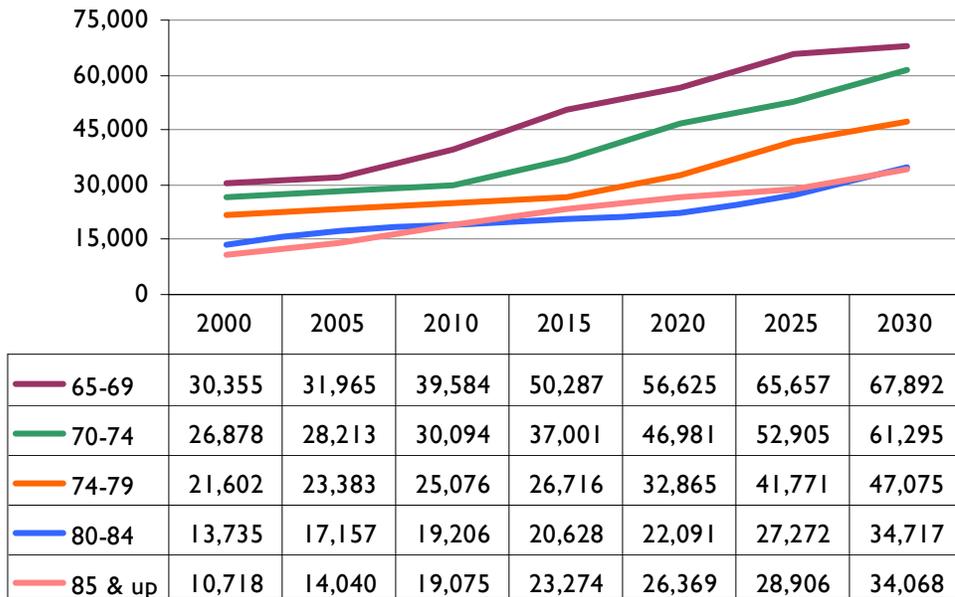

The growing size and the changing demographics of Delaware's population is central to the understanding of the distribution of nursing homes (and for that matter assisted living and rest residential facilities), the number of licensed nursing home beds and their utilization. To provide the context within which to evaluate the availability of facilities for the elderly, we are including two charts. The first chart presents the growing trend in the size of Delaware's total population. Chart two, presents the growing number of those who are aged 65 and above. In both cases, significant increases are estimated. First, the estimates by the Delaware Population Consortium indicate a 35% jump in the total number of Delawareans from 2000 to 2030. The growth is distributed unevenly across counties. Sussex County's total population growth during this time period is estimated at 73%, with Kent County following at 50% and New Castle County following at 17%. Looking at the total number of Delawareans aged 65 and above, the change is even more dramatic. Based on the numbers from the Delaware Population Consortium, it is estimated that the population of Delawareans aged 65 and above will grow 137% (103,288 to 245,047) from 2000 to 2030.

II. FACILITY CHARACTERISTICS

NUMBER OF NURSING HOME BEDS

The number of nursing homes in Delaware increased from 47 in 2007 to 48 in 2008. The number of licensed beds increased from 4,934 in 2007 to 5,089 in 2008. Of the total beds, approximately 87.3% were privately owned in 2007, with a slight increase to 87.7% in 2008. Correspondingly, the percentage of beds in public facilities decreased from 12.7% to 12.3%.

UTILIZATION

For private and public facilities together, the number of patient days increased by 3.2% between 2007 and 2008. The number of patient days in private facilities increased by 3.4%. Looking at private facilities by county, the growth was unevenly distributed - there was a 0.3% increase in New Castle, a 16.1% increase in Kent and a 4.4% in Sussex County. The public facilities experienced an increase of 0.5% from 2007 to 2008.

ADMISSIONS

Between 2007 and 2008 there was a 13.4% increase in admissions among Delaware's nursing homes. Admissions to private facilities increased by 13.4% while admissions to public facilities increased by 11.5% between 2007 and 2008. Comparing admissions from a decade ago, the number of admissions combined for all facilities increased by about 38%. Admissions at public facilities declined 16.6%, while admissions at private facilities grew by about 39%.

The percent of patients admitted to Delaware nursing homes by race within specific age groups is presented in the figure below. About 10% of whites admitted to Delaware’s nursing homes are under age 65, while about 22% of blacks admitted to nursing home are in this age group. Clearly, the age of patient admission to nursing homes in Delaware varies by race. Blacks tend to enter nursing homes in Delaware at a younger age than whites. Of the black admissions in 2008, 48.4% were less than 75 years of age, compared to 26.5% for whites.

Although blacks are admitted to Delaware nursing homes at a younger age, the percent of black admissions (from all admissions) is lower than white admissions in all age groups as indicated in the figure below. This figure shows the percent of all patients admitted to Delaware nursing homes in the year 2008 by race and age. From all admissions to Delaware nursing homes, only 3.7% were black and under 65 while more than double (8.5%) are whites in the same age category.

DISCHARGES

The number of patients discharged from nursing homes across Delaware increased from 8,833 in 2007 to 9,919 in 2008 (12.3% increase). The number of patients discharged from private facilities increased 12.6% while the number of patients discharged from public facilities declined by 8% (from 138 in 2007 to 127 in 2008). The change in the number of discharges between 2007 and 2008 from private facilities varies significantly across counties. Discharges in New Castle County increased marginally (0.2%), while discharges from private facilities in Kent County increased 22.2%, and 40.6% in Sussex County.

The proportion of patients discharged to different destinations varies by the type of facility. For example, patients in public facilities are less likely to be discharged to home (13.4% from public and 46.6% from private) or hospital (8.7% from public, 29.2% from private) and more likely to be discharged due to death (52.8% from public, 13.9% from private) than their counterparts in private facilities.

The percent of patients discharged from Delaware's nursing homes by race within specific age groups is presented in the figure below. About 9.9% of whites discharged from Delaware's nursing homes are under age 65, while 20.8% of blacks discharged are in this age group. Clearly, the age of patients discharged from nursing homes in Delaware varies by race. Blacks tend to be discharged from nursing homes in Delaware at a younger age than whites. Of the black discharges in 2008, 46% were less than 75 years of age, compared to 25.3% for whites.

SOURCES OF PAYMENT

The source of payment for nursing home care varies by type of facility. In private facilities, approximately 51.0% of the residents had Medicaid as the source of payment, while 76.3% of patients in public nursing homes were paid by Medicaid in 2008. About 26.2% of patients in private facilities were self-pay in 2008, while only 19.6% of patients in public facilities were self-pay. Medicare is not a major payer of nursing home care. In 2008, Medicare was the source of payment for 15.4% of all patients. In private facilities, about 17% of patients were paid by Medicare, and in public facilities only 0.4% were paid by Medicare. However, the percent of Medicare patients has changed considerably since 1998 when the percentage of patients with Medicare as a source of payment stood at 8.4%. Today, Medicare pays for nursing home care for 15.4% of patients.

The chart below tabulates the estimates of Medicaid patient days for Delaware’s public and private facilities for the period of 1998 to 2008. Please note that the counts of Medicaid days are based on end of month reporting. To estimate the patient days it was assumed that those who were reported to be at the facility at the end of the month were also there for the whole month. This assumption very likely overstates the number of Medicaid patient days. However, the expectation is that the assumption does not impact the magnitude of the difference between private and public facilities.

Center for Applied Demography & Survey Research (CADSR) is a project - oriented, policy analysis and survey research center. The Center's primary mission is to ensure that the best possible data and information on important public issues are developed and made available to members of the College, its clients, and, most importantly, to the policy-makers who affect the way we all live and work in Delaware. This mission is accomplished in four different ways: by acting as a clearinghouse for large data sets supplied by local, state, regional, and federal agencies; by maintaining an active survey research capability; by developing and designing custom databases of text, graphical information (including both raster and vector data), drawn from client files; and by using an array of information system technologies.

An Equal Opportunity/Affirmative Action Employer

The University of Delaware is committed to assuring equal opportunity to all persons and does not discriminate on the basis of race, color, gender, religion, ancestry, national origin, sexual preference, veteran status, age, or disability in its educational programs, activities, admissions, or employment practices as required by Title IX of the Educational Amendments of 1972, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, the Americans with Disabilities Act, other applicable statutes, and University policy. Inquiries concerning these statutes and information regarding campus accessibility and Title VI should be referred to the Affirmative Action Officer, 305 Hullihen Hall, 302/831-2835 (voice), 302/831-4552(TDD).
