

2018 DELAWARE NURSING HOME UTILIZATION STATISTICAL REPORT

**Delaware Health and Social Services
Health Care Commission
410 Federal Street
Dover, DE 19901**

DELAWARE HEALTH AND SOCIAL SERVICES

EXECUTIVE SUMMARY

In 2018, 47 Delaware nursing homes operated a total of 4,940 licensed beds. Most Delaware nursing homes (45 of 47) were privately owned and operated in 2018. Privately-owned licensed beds accounted for 94.3% of all licensed nursing home beds in Delaware. Delaware's two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically Ill) accounted for the remaining 5.7% of statewide nursing home beds. In 2018, private nursing homes in New Castle, Kent, and Sussex Counties operated at 88.0%, 77.8%, and 87.7% occupancy, respectively; Delaware's public nursing homes operated at 59.9% occupancy. Since 2014, occupancy rates for private nursing homes have experienced slight declines across all three counties.

In 2018, a total of 11,870 patients were admitted to Delaware nursing homes. The annual number of admissions to private Delaware nursing homes fluctuated mildly from 2008 to 2018. In New Castle and Kent Counties, the total number of 2018 admissions exceeded those of 2008; in Sussex County, fewer nursing home patients were admitted in 2018 compared to 2008. Conversely, annual admissions to public nursing homes have fluctuated more erratically. Over the past decade, public nursing home admissions peaked in 2008. As public facilities closed and/or reduced their number of available beds, admissions to public nursing homes declined. The DHCC continues to monitor annual nursing home admissions data to identify newly-emerging trends pertaining to long-term care and rehabilitations services within Delaware.

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. Between 2015 and 2050, Delaware's total population is expected to increase 15.7%. Projected population growth is more dramatic among older Delawareans. From 2015 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 65.1% (from 157,691 to 260,414). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2015 and 2050, statewide percentages of residents age 75-79, 80-84, and 85+ are projected to increase 69.0%, 116.6%, and 196.4%, respectively.

ACKNOWLEDGEMENTS

This report was funded by the Delaware Health and Social Services, Health Care Commission; it is the product of collaborative support from the Delaware Health Care Facilities Association, the Division of Services for Aging and Adults with Physical Disabilities, and all Delaware nursing homes. The Health Care Commission thanks these stakeholders and other subject matter experts who provided background information, analysis, and feedback to inform the development of this report.

INTRODUCTION

This, the 32nd edition of the Delaware Nursing Home Utilization Statistical Report (DNHUSR), summarizes 2018 data submitted by Delaware nursing homes¹. On a monthly basis, from January through December 2018, Delaware nursing homes submitted utilization data to the Delaware Health Care Commission (DHCC). DHCC contacted nursing home facilities on the first day of each month via e-mail to request facility utilization data for the previous month; if a facility's monthly data submission was delayed, follow-up contact was made via fax and telephone. Upon initial data submission, DHCC converted the data to an electronic format and reviewed each facility's report for internal consistency and monitoring. At the end of the reporting year, DHCC aggregated monthly data to yield annual estimates by facility and county.

The DNHUSR presents 2018 Delaware nursing home data in two main sections. **Part 1: Delaware Nursing Home Utilization Statistics** highlights historical facility utilization trend data from 2008 through 2018. Most data presented in this section are aggregated to the state- and county-levels. **Part 2: Facility Statistics** presents facility-level measures, including total patient days, occupancy rates, percentage of patients by source of payment, and annual admissions and discharges. Percentages in any given data category may not sum to 100% due to numerical rounding. Refer to Appendix A for changes in facilities' names and/or number of licensed beds that occurred in 2018.

STATEWIDE POPULATION PROJECTIONS

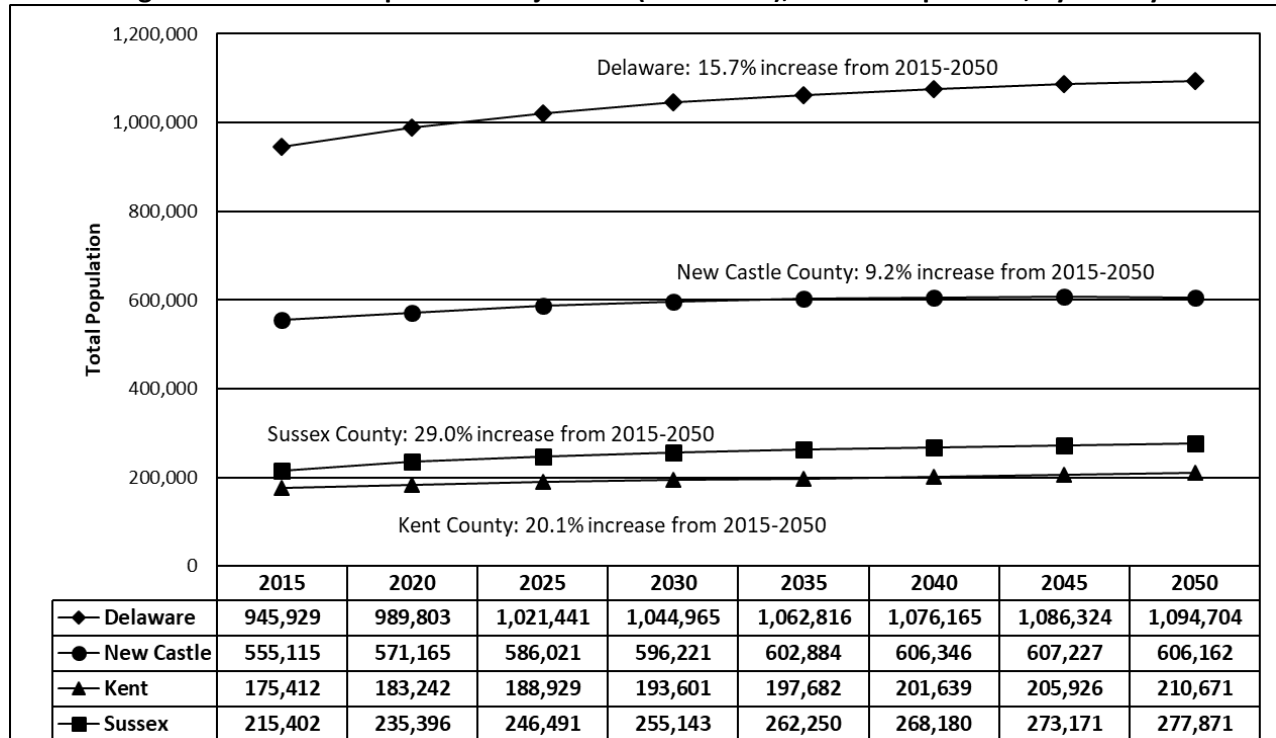

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. DHCC analyzed 2018 Delaware Population Consortium data to provide the context within which to evaluate Delaware's ability to meet nursing home bed demand. Figure 1 shows the projected increase of Delaware's total population from 2015 to 2050. Figure 2 shows the projected population increase over the same time period among Delawareans age 65 and older.

Between 2015 and 2050, Delaware's total population is expected to increase 15.7% (from 945,929 in 2015 to 1,094,704 in 2050). Overall population growth is distributed unevenly across Delaware's counties. From 2015-2050, Kent and Sussex Counties are expected to experience a 20.1%

¹ Excluded from this report are facilities that serve individuals under the age of 18, as well as Intermediate Care Facilities for Individuals with Intellectual Developmental Disabilities (ICF/IID). ICF/IID facilities provide active and comprehensive and individualized treatment and rehabilitation services to promote functional status and independence.

increase and 29.0% increase in total population, respectively; total population growth for New Castle County is estimated at 9.2% over the same time period.

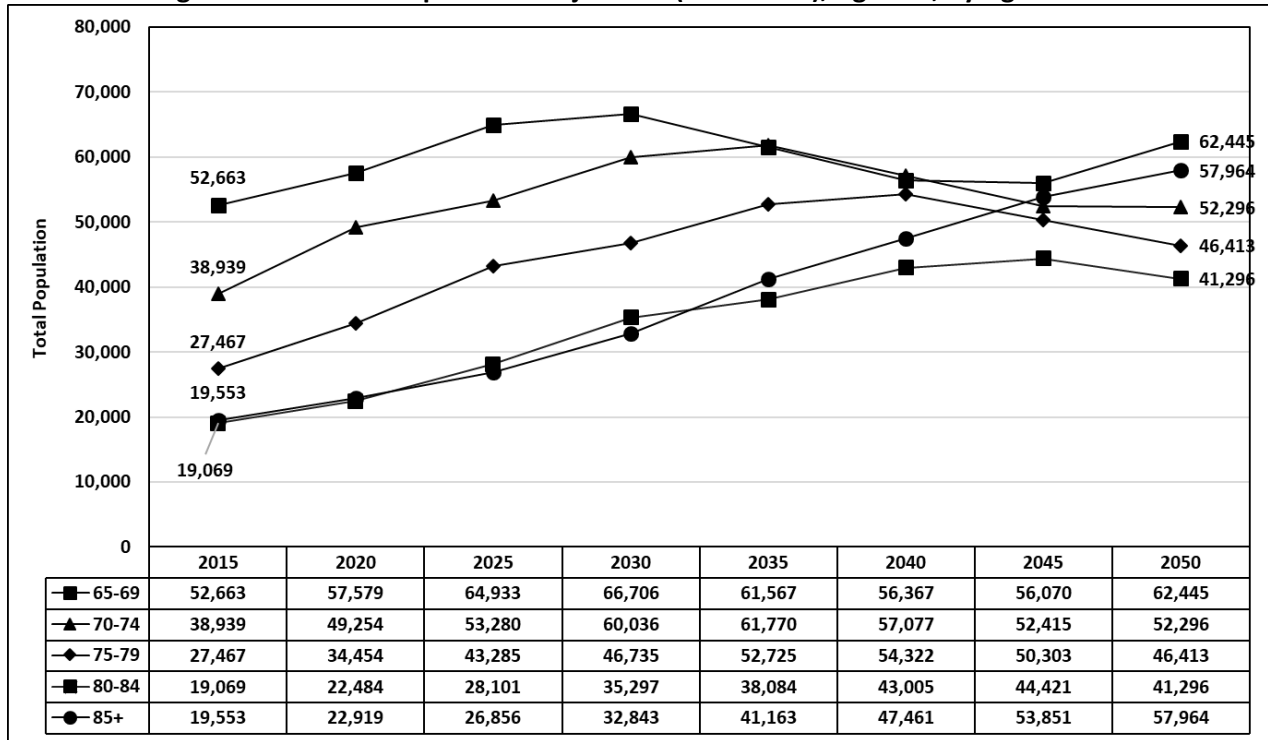

Figure 1: Delaware Population Projections (2015-2050), Overall Population, by County

Source: Annual Population Projections, Delaware Population Consortium, Version 2018.0, October 2018.

Projected population growth is more dramatic among older Delawareans. From 2015 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 65.1% (from 157,691 to 260,414). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2015 and 2050, statewide percentages of residents age 75-79, 80-84, and 85+ are projected to increase 69.0%, 116.6%, and 196.4%, respectively.

PART 1: 2018 DELAWARE NURSING HOME UTILIZATION STATISTICS

NUMBER OF NURSING HOME BEDS

In 2018, 47 Delaware nursing homes operated 4,940 licensed beds. Most Delaware nursing homes – 45 out of 47 – were privately owned and operated in 2018. Private facilities operated 94.3% of all nursing home beds in Delaware. Delaware’s two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically Ill) operated the remaining 5.7% of nursing home beds.

Table 1: Delaware Nursing Home Beds, by County and Facility Type, 2008-2018

Year	Private Facilities								Public Facilities		All Facilities	
	New Castle County		Kent County		Sussex County		Total Private

UTILIZATION

A commonly-used measure of nursing home utilization is the number of billable patient days generated by a facility over a given time period. A billable patient day represents a unit of time (i.e., one day) during which the facility’s services are used by one patient. For example, if a nursing home has 100 patients on a day, the facility has generated 100 billable patient days for that 24-hour period. If a facility’s number of billable patient days increases from one time period to the next, it is an indication that the facility is caring for more patients, caring for patients for longer periods of time, or a combination of these two factors. Mathematically, billable patient days per facility per year are calculated by summing each facility’s monthly billable patient days over a 12-month period.

Long-term trends reveal shifts in the number of patient days by county and facility type. Across

private facilities in all three counties, the number of 2018 billable patient days reflect an increase over those in 2008. However, from 2014-2018, annual number of billable patient days declined among private nursing homes across the state. These declines may reflect national trends by which the expansion of home and community-based services and supports has shifted the locus of long-term care away from nursing homes.

Table 2: Number of Billable Patient Days Utilized by Year, Facility Type, and County, 2008-2018

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2008	833,344	208,235	387,715	1,429,294	143,640	1,572,934
2009	824,262	219,019	404,234	1,447,515	137,584	1,585,099
2010	838,037	218,593	402,188	1,458,818	137,824	1,596,642

OCCUPANCY

Occupancy rates are helpful for putting facilities' utilization data within the context of available resources. A facility's occupancy rate reflects the percentage of available beds occupied by patients throughout the reporting year. Occupancy rates were weighted based on the number of days a facility was open during the reporting year. Mathematically, for facilities that were open 365 days of the reporting year, **Weighted Occupancy Rate** = [(Number of Billable Patient Days) / (Number of Licensed Bed Days)] * 100% where (Number of Licensed Bed Days) equaled the number of licensed beds in a facility (calculated as the average number of beds over the entire 12-month period) multiplied by 365. If a facility was open fewer than 365 days of the reporting year, the same weighted occupancy formula was used with the exception that (Number of Licensed Bed Days) equaled the number of licensed beds multiplied by the actual number of days the facility was open.

In 2018, private nursing homes in New Castle, Kent, and Sussex Counties operated at 88.0%, 77.8%, and 87.7% occupancy, respectively (Table 3). In 2018, Delaware's two public nursing homes collectively operated at 59.9% occupancy. Since 2014, occupancy rates for private nursing homes have declined in all three counties. The noticeable decline in occupancy rates for private Kent County nursing homes between 2017 and

2018 (from 86.7% to 77.8%) reflects two facility-related nuances: (a) the Delaware Veterans Home operates at a comparatively lower-occupancy (48.0% in 2018) due to admissions-based patient criteria and (b) The Center for Eden Hill (an 80-bed facility) became operational in April 2018 with an accompanying admissions ramp-up period during which occupancy rates averaged 34.4%.

Table 3: Weighted Occupancy Rates, 2008-2018, by Facility Type and County

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2008	91.4%	88.9%	80.3%	87.7%	62.9%	84.7%
2009	89.6%	93.5%	89.7%	90.2%	60.2%	86.5%

2008-2018 % Change	-3.7%	-12.5%	9.2%	-1.6%	-4.8%	0.1%

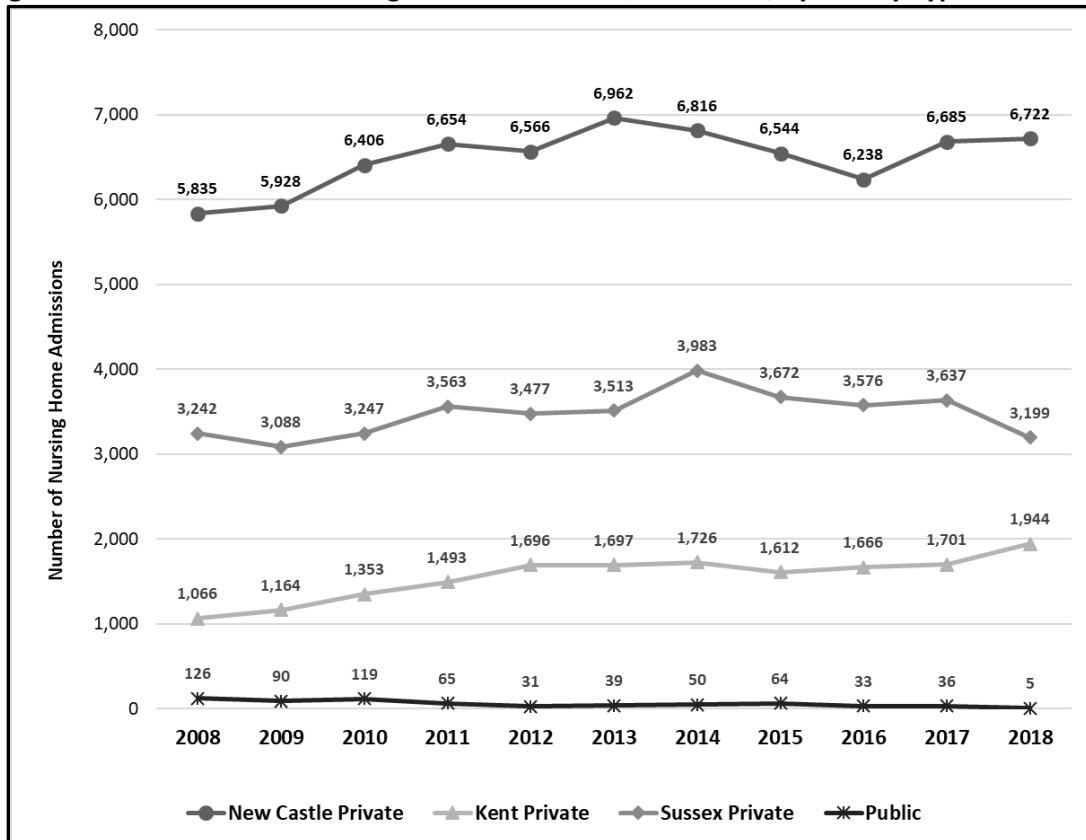

ADMISSIONS

The annual number of admissions to private Delaware nursing homes has fluctuated mildly since 2008 (Table 4). In New Castle and Kent Counties, the total number of 2018 admissions exceeded that of 2008; in Sussex County, fewer nursing home patients were admitted in 2018 compared to 2008. Overall, within Delaware's three counties, the total number of private nursing home admissions remained stable or slightly increased from 2008-2018 (Figure 3). Conversely, annual admissions to public nursing homes have fluctuated more erratically. Over the past decade, public nursing home admissions peaked in 2008. As public facilities closed and/or reduced their number of available beds, admissions to public nursing homes declined. In 2018, just five patients were admitted to Delaware's two public nursing homes.

Table 4: Total Number of Nursing Home Admissions, 2008-2018, by Facility Type and County

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2008	5,835	1,066	3,242	10,143	126	10,269
2009	5,928	1,164	3,088	10,180	90	10,270
2010	6,406	1,353	3,247	11,006	119	11,125
2011	6,654	1,493	3,563	11,710	65	11,775
2012	6,566	1,696	3,477	11,739	31	11,770
2013	6,962	1,697	3,513	12,172	39	12,211
2014	6,816	1,726	3,983	12,525	50	12,575
2015	6,544	1,612	3,672	11,828	64	11,892
2016	6,238	1,666	3,576	11,480	33	11,513
2017	6,685	1,701	3,637	12,023	36	12,059
2018	6,722	1,944	3,199	11,865	5	11,870
2008-2018 % Change	15.2%	82.4%	-1.3%	34.5%	-96.0%	15.6%

Figure 3: Total Number of Nursing Home Admissions, 2008-2018, by Facility Type and County

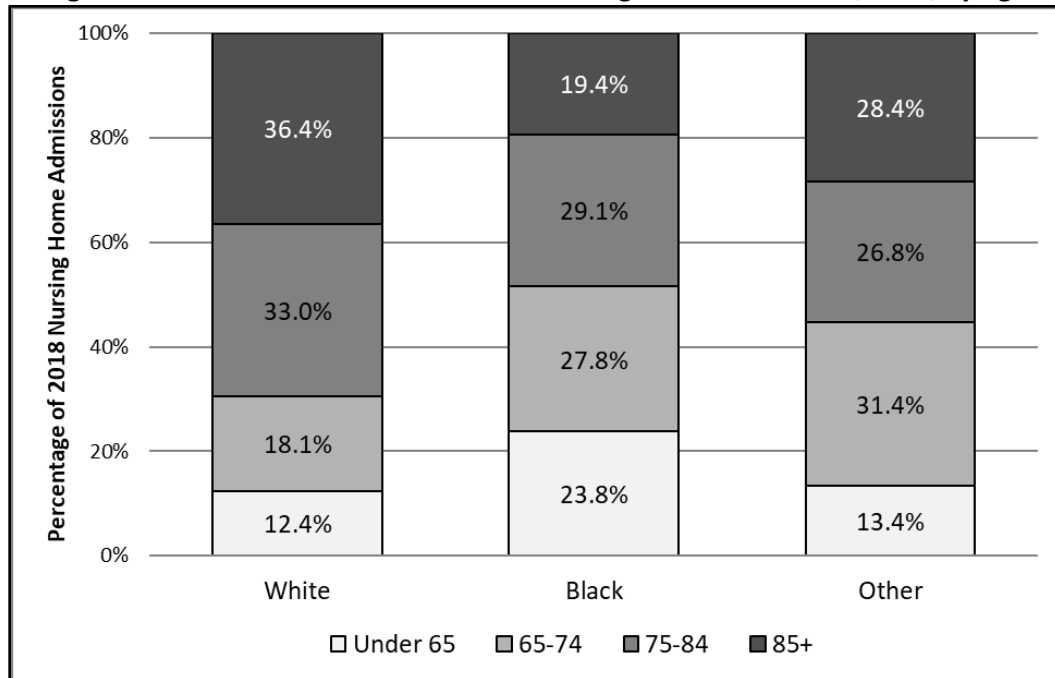

As shown in Table 5, White patients accounted for 78.4% of all 2018 Delaware nursing home admissions. Black patients and patients of other races accounted for 19.1% and 2.5% of 2018 nursing home admissions, respectively. This racial breakdown of nursing home admissions is in line with Delaware's demographic distribution. Patients 75-84 years and 85 years+ accounted for 32.1% and 32.9%, respectively, of 2018 Delaware nursing home admissions. One-fifth (20.3%) of 2018 nursing home admissions were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for 14.6% of 2018 admissions.

Table 5: Percentage of Total Delaware Nursing Home Admissions, by Race and Age, 2018

	Age Groups				
	Under 65	65-74	75-84	85+	Total Admissions (by Race)
White Admissions (N=9,308)	12.4%	18.1%	33.0%	36.4%	78.4%
Black Admissions (N=2,263)	23.8%	27.8%	29.1%	19.4%	19.1%
Other Admissions (N=299)	13.4%	31.4%	26.8%	28.4%	2.5%
Total Admissions (by Age) (N=11,870)	14.6%	20.3%	32.1%	32.9%	100.0%

Although Black patients and patients of other races comprised a combined 21.6% of all 2018 nursing home admissions, they represent overall younger populations compared to White patients admitted to nursing homes. As shown in Figure 4, in 2018, just 12.4 % of all White nursing home admissions were under the age of 65. Relative to this, individuals under the age of 65 accounted for 23.8% of Black admissions. Among Black patients admitted to Delaware nursing homes in 2018, 51.6% were age 74 and under; in comparison, 30.5% of White admissions were under the age of 74. Thus, while White patients accounted for substantially more nursing home admissions overall, Black patients and patients of other races tended to be younger when they admitted to Delaware nursing homes.

Figure 4: Racial Breakdown of Delaware Nursing Home Admissions, 2018, by Age

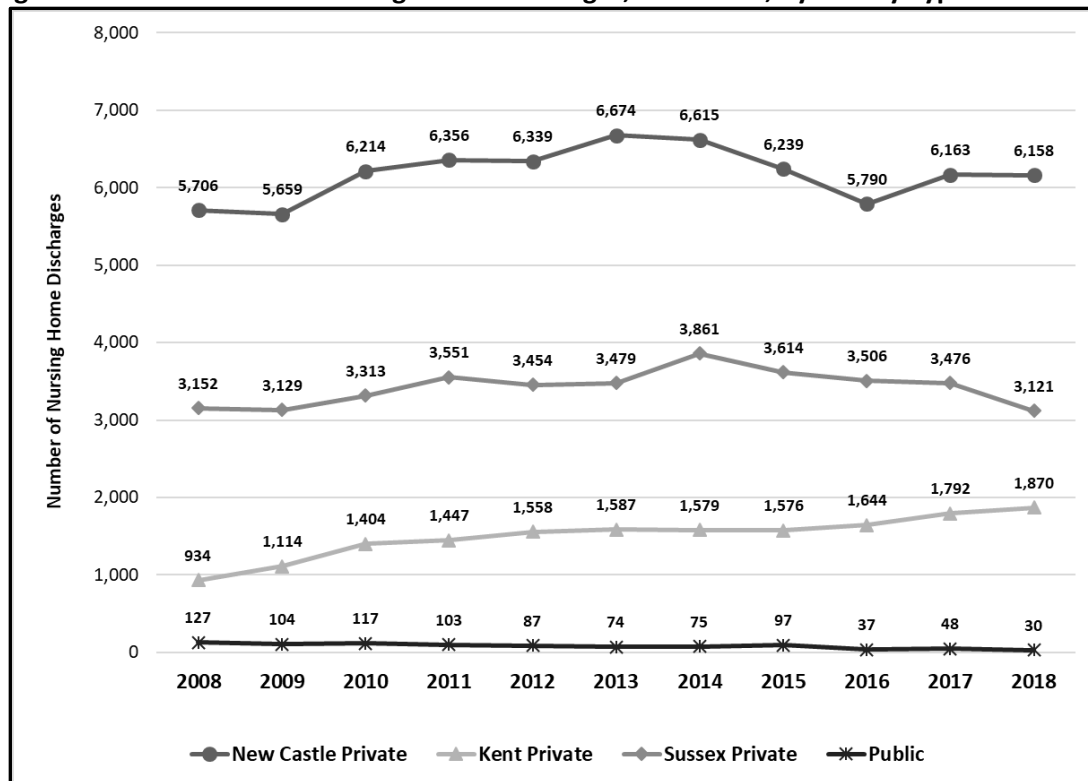

DISCHARGES

In 2018, Delaware nursing homes discharged 11,179 patients. The annual number of discharges from private nursing homes has fluctuated since 2008 (Table 6; Figure 5). From 2008 to 2013, discharges from private facilities increased across all three counties; beginning in 2014 and 2015, annual discharges from private facilities began to decline in New Castle County and Sussex County, respectively. Annual number of discharges have steadily increased in Kent County from 2008 to 2018. Annual discharges from public nursing homes have been erratic. Over the past decade, the peak number of public nursing home discharges occurred in 2008. As public facilities closed and/or reduced their number of available beds, discharges from public nursing homes declined.

Table 6: Total Number of Nursing Home Discharges, 2008-2018, by Facility Type and County

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2008	5,706	934	3,152	9,792	127	9,919
2009	5,659	1,114	3,129	9,902	104	10,006
2010	6,214	1,404	3,313	10,931	117	11,048
2011	6,356	1,447	3,551	11,354	103	11,457
2012	6,339	1,558	3,454	11,330	87	11,417
2013	6,674	1,587	3,479	11,740	74	11,814
2014	6,615	1,579	3,861	12,055	75	12,130
2015	6,239	1,576	3,614	11,429	97	11,526
2016	5,790	1,644	3,506	10,940	37	10,977
2017	6,163	1,792	3,476	11,431	48	11,479
2018	6,158	1,870	3,121	11,149	30	11,179
2008-2018 % Change	7.9%	100.2%	55.1%	13.9%	-76.4%	12.7%

Figure 5: Total Number of Nursing Home Discharges, 2008-2018, by Facility Type and County

As in previous years, in 2018, discharge destination varied greatly by facility type (Table 7). A larger percentage of patients discharged from private facilities returned home compared to patients discharged from

public facilities (58.1% vs. 6.7%, respectively). Seventy-seven percent of patients discharged from public facilities represented discharges due to death; among discharges from private nursing homes, 10.8% represented discharges due to death.

Table 7: Percentage of 2018 Nursing Home Discharges, by Discharge Destination

	Discharge Destination						
Facility Type	Home	Hospital	Assisted Living	Private LTCF	State Owned LTCF	Death	Other
Private (N=11,149)	58.1%	22.9%	4.2%	3.0%	0.3%	10.8%	0.7%
Public (N=30)	6.7%	6.7%	0.0%	3.3%	3.3%	76.7%	3.3%
All facilities (N=11,179)	57.9%	22.9%	4.2%	3.0%	0.3%	10.9%	0.8%

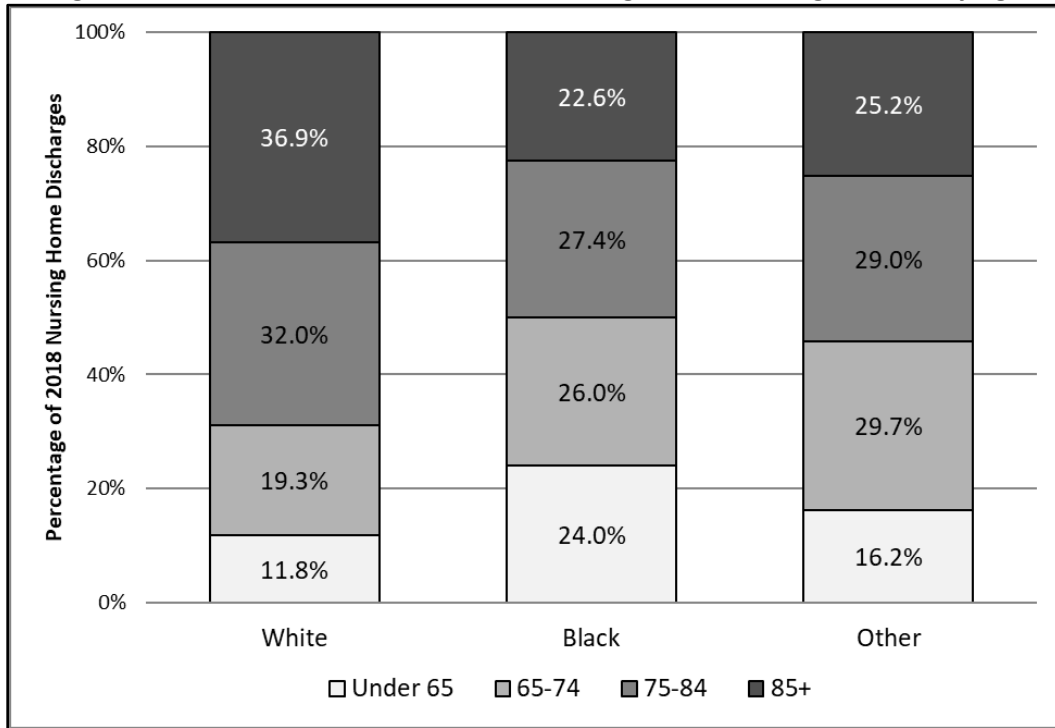

Discharge statistics mirror admission statistics in terms of patient race and age (Table 8). White patients accounted for 79.2% of Delaware nursing home discharges in 2018. Black patients and patients of other races accounted for 18.5% and 2.2% of 2018 nursing home discharges, respectively. Individuals 75-84 years and 85 years+ accounted for 31.0% and 34.0% of Delaware nursing home discharges, respectively. One-fifth (20.8%) of 2018 nursing home discharges were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 14.1% of 2018 discharges.

As with nursing home admissions, Black patients and patients of other races discharged from Delaware nursing homes represent an overall younger population (Figure 6). Thus, while White patients accounted for substantially more nursing home discharges overall, Black patients and patients of other races discharged from Delaware nursing homes represent a younger population in general.

Table 8: Percentage of Total Delaware Nursing Home Discharges, by Race and Age, 2018

	Age Groups				
	Under 65	65-74	75-84	85+	Total Discharges (by Race)
White Discharges (N=8,857)	11.8%	19.3%	32.0%	36.9%	79.2%
Black Discharges (N=2,032)	24.0%	26.0%	27.4%	22.6%	18.2%
Other Discharges (N=290)	16.2%	29.7%	29.0%	25.2%	2.6%
Total Discharges (by Age) (N=11,179)	14.1%	20.8%	31.0%	34.0%	100.0%

Figure 6: Racial Breakdown of Delaware Nursing Home Discharges, 2018, by Age

SOURCE OF PAYMENT

Patient payment source for nursing home care varied by type of facility (Table 9). In 2018, the majority (85.6%) of patients in public nursing homes used Medicaid as a source of payment; among patients at private Delaware nursing homes, 60.9% utilized Medicaid funds. Sixteen percent of private Delaware nursing home patients used Medicare as a source of payment compared to just 0.7% of public nursing home patients. Ten percent of public nursing home patients and 16.7% of private nursing home patients self-paid for their care. A different payment source was utilized by 3.6% of public nursing home patients and 5.9% of private nursing home patients.

Table 9: Percentage of Delaware Nursing Home Patients by Payment Source and Nursing Home Status, 2008-2018

Source of Payment	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018

Notes: NCC=New Castle County. Weighted occupancy rates for individual facilities are calculated as the ratio of Billable Patient Days and Licensed Bed Days. Licensed Bed Days are calculated as (Number of Licensed beds (as of December of the reporting year))*(Total days the facility was open during the reporting year). Weighted occupancy rates at county, facility type, and state levels are calculated as the ratio of Billable Patient Days (sum of each facility in the category) and Licensed Bed Days (sum of each facility in the category).
