2019 DELAWARE NURSING HOME UTILIZATION STATISTICAL REPORT

Delaware Health and Social Services Health Care Commission 410 Federal Street Dover, DE 19901

DELAWARE HEALTH AND SOCIAL SERVICES

EXECUTIVE SUMMARY

In 2019, 47 Delaware nursing homes operated a total of 4,928 licensed beds. Most Delaware nursing homes (45 of 47) were privately owned and operated in 2019. Private facilities operated 94.3% of all nursing home beds in Delaware. Delaware's two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically III) operated the remaining 5.7% of nursing home beds. In 2019, private nursing homes in New Castle, Kent, and Sussex Counties operated at 87.5%, 78.2%, and 88.2% occupancy, respectively; Delaware's public nursing homes operated at 52.4% occupancy.

In 2019, a total of 11,821 patients were admitted to Delaware nursing homes. In the same year, facilities discharged 11,353 patients. Sixty-one percent of patients discharged from Delaware nursing homes in 2019 were discharged home. Admissions and discharges to Delaware nursing homes follow demographic trends across Delaware. In 2019, White patients accounted for 78.6% of admissions and 79.2% of discharges; Black patients accounted for 19.1% of admissions and 18.7% of discharges. Patients 75-84 years and 85 years or older accounted for 31.5% and 32.7%, respectively, of 2019 Delaware nursing home admissions. Twenty-two percent of 2019 nursing home admissions were individuals ages 65-74. Individuals under the age of 65 accounted for 13.5% of 2019 admissions. Similar age-related trends were observed for 2019 discharges.

The Delaware Health Care Commission (DHCC) continues to monitor annual nursing home admissions data to identify newly-emerging trends pertaining to long-term care and rehabilitations services within Delaware. Long-term care utilization surveillance includes monitoring projected changes in population size at the county and state levels. The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization.

Between 2020 and 2050, Delaware's total population is expected to increase 7.6% (from 977,780 in 2020 to 1,051,762 in 2050). Overall population growth is distributed unevenly across Delaware's counties (New Castle: 2.3%; Kent: 5.4%; Sussex: 21.9%). Projected population growth is more dramatic among older Delawareans. From 2020 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 39.2% (from 185,011 to 257,590). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2020 and 2050, statewide percentages of residents age 65-69, 75-79, 80-84, and 85+ are projected to increase 8.3%, 5.9%, 34.3%, 82.7%, and 153.6%, respectively.

ACKNOWLEDGEMENTS

This report was funded by the Delaware Health and Social Services, Health Care Commission; it is the product of collaborative support from the Delaware Health Care Facilities Association, the Division of Services for Aging and Adults with Physical Disabilities, and all Delaware nursing homes. The Health Care Commission thanks these stakeholders and other subject matter experts who provided background information, analysis, and feedback to inform the development of this report.

INTRODUCTION

This, the 33rd edition of the Delaware Nursing Home Utilization Statistical Report (DNHUSR), summarizes 2019 data submitted by Delaware nursing homes¹. On a monthly basis, from January through December 2019, Delaware nursing homes submitted utilization data to the Delaware Health Care Commission (DHCC). DHCC contacted nursing home facilities on the first day of each month via e-mail to request facility utilization data for the previous month; if a facility's monthly data submission was delayed, follow-up contact was made via fax and telephone. Upon initial data submission, DHCC converted the data to an electronic format and reviewed each facility's report for internal consistency and monitoring. At the end of the reporting year, DHCC aggregated monthly data to yield annual estimates by facility and county.

The DNHUSR presents 2019 Delaware nursing home data in two main sections. Part 1: Delaware Nursing Home Utilization Statistics highlights historical facility utilization trend data from 2009 through 2019. Most data presented in this section are aggregated to the state- and county-levels. Part 2: Facility-Level Nursing Home Utilization Statistics presents facility-level measures, including total patient days, occupancy rates, percentage of patients by source of payment, and annual admissions and discharges. Percentages in any given data category may not sum to 100% due to numerical rounding. Refer to Appendix B for changes in facilities' names and/or number of licensed beds that occurred in 2019.

STATEWIDE POPULATION PROJECTIONS

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. DHCC analyzed 2019 Delaware Population Consortium data to provide the context within which to evaluate Delaware's ability to meet nursing home bed demand. Figure 1 shows the projected increase of Delaware's total population from 2020 to 2050. Figure 2 shows the projected population increase over the same time period among Delawareans age 65 and older.

Between 2020 and 2050, Delaware's total population is expected to increase 7.6% (from 977,780 in 2020 to 1,051,762 in 2050). Overall population growth is distributed unevenly across Delaware's

¹ Excluded from this report are facilities that serve individuals under the age of 18, as well as Intermediate Care Facilities for Individuals with Intellectual Developmental Disabilities (ICF/IID). ICF/IID facilities provide active and comprehensive and individualized treatment and rehabilitation services to promote functional status and independence.

counties. From 2020-2050, New Castle and Kent Counties are expected to experience a 2.3% and 5.4% increase in total population, respectively; total population growth for Sussex County is estimated at 21.9% for the same time period.

Figure 1: Delaware Population Projections (2015-2050), Overall Population, by County

Source: Annual Population Projections, Delaware Population Consortium, Version 2019.0, October 2019.

Projected population growth is more dramatic among older Delawareans. From 2020 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 39.2% (from 185,011 to 257,590). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2020 and 2050, statewide percentages of residents age 65-69, 75-79, 80-84, and 85+ are projected to increase 8.3%, 5.9%, 34.3%, 82.7%, and 153.6%, respectively (Figure 2).

PART 1: 2019 DELAWARE NURSING HOME UTILIZATION STATISTICS

NUMBER OF NURSING HOME BEDS

In 2019, 47 Delaware nursing homes operated 4,928 licensed beds. Most Delaware nursing homes – 45 out of 47 – were privately owned and operated in 2019. Private facilities operated 94.3% of all nursing home beds in Delaware. Delaware's two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically III) operated the remaining 5.7% of nursing home beds.

Table 1: Delaware Nursing Home Beds, by County and Facility Type, 2009-2019

UTILIZATION

A commonly-used measure of nursing home utilization is the number of billable patient days generated by a facility over a given time period. A billable patient day represents a unit of time (i.e., one day) during which the facility's services are used by one patient. For example, if a nursing home has 100 patients on a day, the facility has generated 100 billable patient days for that 24-hour period. If a facility's number of billable patient days increases from one time period to the next, it is an indication that the facility is caring for more patients, caring for patients for longer periods of time, or a combination of these two factors. Mathematically, billable patient days per facility per year are calculated by summing each facility's monthly billable patient days over a 12-month period. In 2014, annual billable patient days for private facilities in New Castle and Sussex Counties began gradually declining. These declines may reflect national trends by which the expansion of home and community-based services and supports has shifted the locus of long-term care away from nursing homes. The increase in billable patient days among private facilities in Kent County from 2018 (209,311) to 2019 (218,157) is partially explained by the impact of The Center for Eden Hill, an 80-bed private facility in Kent County that became operational in April 2018. Following its opening, the facility experienced an accompanying ramp-up period during which occupancy rates averaged 34.4%; the corresponding 2019 occupancy rate for The Center for Eden Hill was 64.4%.

Table 2: Number of Billable Patient Days Utilized by Year, Facility Type, and County, 2009-2019

OCCUPANCY

Occupancy rates are helpful for putting facilities' utilization data within the context of available resources. A facility's occupancy rate reflects the percentage of available beds occupied by patients throughout the reporting year. Occupancy rates were weighted based on the number of days a facility was open during the reporting year. Mathematically, for facilities that were open 365 days of the reporting year, **Weighted Occupancy Rate** = [(Number of Billable Patient Days) / (Number of Licensed Bed Days)] * 100% where (Number of Licensed Bed Days) equaled the number of licensed beds in a facility (calculated as the average number of beds over the entire 12-month period) multiplied by 365. If a facility was open fewer than 365 days of the reporting year, the same weighted occupancy formula was used with the exception that

(Number of Licensed Bed Days) equaled the number of licensed beds multiplied by the actual number of days the facility was open.

In 2019, private nursing homes in New Castle, Kent, and Sussex Counties operated at 87.5%, 78.2%, and 88.2% occupancy, respectively (Table 3). In 2019, Delaware's two public nursing homes collectively operated at 52.4% occupancy. Since 2009, occupancy rates for private nursing homes have hovered in the high 80th percentile or low 90th percentile. The comparatively lower occupancy rate for Kent County private nursing homes, in comparison to New Castle and Sussex County private nursing homes, reflects a facility-related nuance: the Delaware Veterans Home (a larger, 150-bed facility) operates at a comparatively lower-occupancy (47.0% in 2019) due to admissions-based patient criteria.

 Table 3: Weighted Occupancy Rates, 2009-2019, by Facility Type and County

ADMISSIONS

As shown in Table 4 and Figure 3, annual admissions to private facilities in New Castle remained fairly stable since 2010, while Kent County private nursing home admissions gradually increased from 2009-2019. From 2009-2019, Sussex County private nursing home admissions fluctuated annually while remaining between 3,000 and 4,000. Conversely, annual admissions to public nursing homes have fluctuated erratically. Over the past decade, public nursing home admissions peaked in 2010. As public facilities closed and/or reduced their number of available beds, admissions to public nursing homes declined. In 2019, just three patients were admitted to Delaware's two public nursing homes.

		Priva	te Facilitie	S

2009-2019 % Change	12.2%	77.2%	0.5%	16.1%	-96.7%	15.1%

Table 4: Total Number of Nursing Home Admissions, 2009-2019, by Facility Type and County

Figure 3: Total Number of Nursing Home Admissions, 2009-2019, by Facility Type and County

White patients accounted for 78.6% of all 2019 Delaware nursing home admissions (Table 5). Black patients and patients of other races accounted for 19.1% and 2.0% of 2019 nursing home admissions, respectively. This racial breakdown of nursing home admissions is in line with Delaware's demographic distribution. Patients 75-84 years and 85 years or older accounted for 31.5% and 32.7%, respectively, of 2019 Delaware nursing home admissions. Twenty-two percent of 2019 nursing home admissions were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for 13.5% of 2019 admissions. (Refer to Appendix A for further information on Delaware nursing home admissions and discharges among the Under 65 population.)

		Age G	roups		
	Under 65	65-74	75-84	85+	Total Admissions (by Race)
White Admissions (N=9,287)	10.7%	20.9%	32.1%	36.3%	78.6%
Black Admissions (N=2,301)	24.2%	28.2%	28.9%	18.5%	19.5%
Other Admissions (N=233)	14.6%	23.2%	31.8%	30.5%	2.0%
Total Admissions (by Age) (N=11,821)	13.5%	22.4%	31.5%	32.7%	100.0%

Table 5: Percentage of Total Delaware Nursing Home Admissions, by Race and Age, 2019

Although Black patients and patients of other races comprised a combined 21.5% of all 2019 nursing home admissions, they represent overall younger populations compared to White patients admitted to nursing homes. As shown in Figure 4, in 2019, just 10.7% of all White nursing home admissions were under the age of 65. Relative to this, individuals under the age of 65 accounted for 24.2% of Black admissions. Among Black patients admitted to Delaware nursing homes in 2019, 52.4% were age 74 and under; in comparison, 31.6% of White admissions were under the age of 74. Thus, while White patients accounted for substantially more nursing home admissions overall, Black patients and patients of other races tended to be younger when they admitted to Delaware nursing homes.

Figure 4: Racial Breakdown of Delaware Nursing Home Admissions, 2019, by Age

DISCHARGES

In 2019, Delaware nursing homes discharged 11,353 patients (Table 6). From 2009 to 2013, discharges from private facilities increased across all three counties; beginning in 2014 and 2015, annual discharges from private facilities began to decline in New Castle County and Sussex County, respectively. Annual private nursing home discharges have gradually increased in Kent County from 2009 to 2019. Annual discharges from public nursing homes substantially declined from 2009 to 2019. As public facilities closed and/or reduced their number of available beds, discharges from public nursing homes drastically declined.

		Priva	ate Faciliti	es		
Year	New Castle County	Kent County	Sussex County	Total Private	Public Facilities	All Facilities
2009	5,659	1,114	3,129	9,902	104	10,006

2019	6,235	2,044	3,040	11,319	34	11,353
2009-2019 % Change	9.3%	118.8%	-3.6%	15.6%	-73.2%	14.5%

Table 6: Total Number of Nursing Home Discharges, 2009-2019, by Facility Type and County

Figure 5: Total Number of Nursing Home Discharges, 2009-2019, by Facility Type and County

As in previous years, in 2019, discharge destination varied greatly by facility type (Table 7). A larger percentage of patients discharged from private facilities returned home compared to patients discharged from public facilities (61.5% vs. 8.8%, respectively). Compared to private nursing home discharges, a larger percentage of patients discharged from public facilities were discharged due to death (61.8% vs. 10.5%, respectively).

		Discharge Destination								
Facility Type	Home	Hospital	Assisted Living	Private LTCF	State Owned LTCF	Death	Other			
Private (N=11,319)	61.5%	19.7%	4.0%	2.7%	0.5%	10.5%	1.1%			
Public (N=34)	8.8%	29.4%	0.0%	0.0%	0.0%	61.8%	0.0%			
All facilities (N=11,353)	61.3%	19.7%	4.0%	2.7%	0.4%	10.7%	1.1%			

 Table 7: Percentage of 2019 Nursing Home Discharges, by Discharge Destination

Discharge statistics mirror admission statistics in terms of patient race and age (Table 8). White patients accounted for 79.2% of Delaware nursing home discharges in 2019. Black patients and patients of other races accounted for 18.7% and 2.1% of 2019 nursing home discharges, respectively. Individuals 75-84 years and 85 years+ accounted for 31.7% and 33.9% of Delaware nursing home discharges, respectively. One-fifth (21.3%) of 2019 nursing home discharges were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 13.1% of 2019 discharges.

As with nursing home admissions, Black patients and patients of other races discharged from Delaware nursing homes represent and overall younger population (Figure 6). Thus, while White patients accounted for substantially more nursing home discharges overall, Black patients and patients of other races discharged from Delaware nursing homes represent a younger population in general.

		Age C	Groups		
	Under 65	65-74	75-84	85+	Total Discharges (by Race)
White Discharges (N=8,994)	10.3%	20.2%	31.8%	37.7%	79.2%
Black Discharges (N=2,124)	24.6%	25.3%	31.0%	19.1%	18.7%
Other Discharges (N=235)	15.7%	24.7%	35.7%	23.8%	2.1%
Total Discharges (by Age) (N=11,353)	13.1%	21.3%	31.7%	33.9%	100.0%

Table 8: Percentage of Total Delaware Nursing Home Discharges, by Race and Age, 2019

SOURCE OF PAYMENT

Patient payment source for nursing home care varied by type of facility (Table 9). In 2019, the majority of both private and public nursing home residents used Medicaid as a source of payment (private: 63.1%, public: 86.2%). Fifteen percent of private Delaware nursing home patients used Medicare as a source of payment compared to just 0.8% of public nursing home patients. Sixteen percent of private nursing home residents and 8.1 percent of public nursing home patients self-paid for their care. A different payment source was utilized by 5.7% of private nursing home patients and 4.9% of public nursing home patients.

Table 11 (Continued) Weighted Occupancy Rates by Facility, Type, and County, 2019

Notes: NCC=New Castle County. Weighted occupancy rates for individual facilities are calculated as the ratio of Billable Patient Days and Licensed Bed Days. Licensed Bed Days are calculated as (Number of Licensed beds (as of December of the reporting year))*(Total days the facility was open during the reporting year). Weighted occupancy rates at county, facility type, and state levels are calculated as the ratio of Billable Patient Days (sum of each facility in the category) and Licensed Bed Days (sum of each facility in the category).

APPENDIX A: 2019 NURSING HOME TRENDS AMONG THE UNDER 65 POPULATION

In February 2019, the DHCC began collecting new admissions, discharge, and billable patient days data on the Under 65 nursing home patient population. In previous years, data pertaining to this cohort were consolidated into an Under 65 category. Revised data collection forms asked facilities to report data for this cohort using the following subcohort categories: ages 18-34, 35-44, 45-54, and 55-64. The DHCC used the new data to begin tracking age-specific key nursing home metrics among younger populations. The 2019 data for the nursing home patient population age 18-34, 35-44, 45-54, and 55-64 serve as baseline data for future surveillance efforts. Below is a summary of data obtained for these sub-cohort age categories.

In 2019, 82% of monthly surveillance reports submitted by Nursing Homes were submitted using the revised form to include key metric data for the 18-34, 35-44, 45-54, and 55-64 sub-cohorts. Tables A1 and A2 include 2019 admissions and discharge data among sub-cohorts within the Under 65 population. Patients under the age of 65 accounted for 1,590 admissions to and 1,488 discharges from Delaware nursing homes in 2019. Age-specific data by sub-cohort were submitted for 1,395 admissions (87.7%) and 1,316 discharges (88.4%). Number of admissions and discharges among the Under 65 population increase with age across the 18-34, 35-44, 45-54, and 55-64 age groups.

The majority of Delaware nursing home admitted at least one patient under the age of 65 in 2019. Eleven private facilities (NCC: 8; Kent: 1; Sussex: 2) and one public facility reported zero admissions among the Under 65 population in 2019 (refer to Tables 13 and 13.1 for more information). Nine private facilities (NCC: 7; Sussex: 2) reported zero discharges among the Under 65 population in 2019 (refer to Tables 16 and 16.1 for more information).

As shown below in Figure A1, apart from the 35-44 sub-cohort, White nursing home patients accounted for a larger share of 2019 admissions among sub-cohorts under the age of 65. Similar trends were observed for 2019 discharges among the Under 65 population (Figure A2).

Figure A1: Racial Breakdown of Delaware Nursing Home Admissions among the Under 65 Patient Population, by Age, 2019

	18-	-34	35-	-44	45	-54	55.	-64	Total U65:	Total U65

Note: Table includes partial data for ages 18-34, 35-44, 45-54, and 55-64 due to a change in data collection procedures in 2019.

APPENDIX B: 2019 FACILITY CHANGES

The chart below reflects all major changes to Delaware nursing homes that occurred in 2019, including the opening of any new facilities, as well as increases and/or decreases in facilities' bed counts.

Facility	Change	Date of Change
WillowBrooke Court County House	In July 2019, WillowBrooke Court Country House decreased its licensed SNF bed count from 60 to 48	July 2019

Table B1: 2019 Delaware Nursing Homes Changes by Facility Name
