PSC 738, Operation and Maintenance of a Mobile Cancer Screening Van

Questions and **Answers:**

1. Does DPH foresee services, other than mammograms being performed on the van?

Only what is requested in the RFP. Eventually would like to see breast and cervical screenings performed at “one stop”.

2. Screenings on van should be limited to either Mammography or Cervical. The van is not large enough to handle both at the same time. They could be set up for different days. Is this a problem?

No, this is not a problem. The current emphasis is on mammography screening; however, DPH will accept proposals with a cervical screening component.
