RE: Delaware Family Planning Waiver

Dear Sharon,

I would encourage inclusion of ESSURE and HSG in the Delaware Family Planning Waiver. ESSURE is a minimally invasive procedure for permanent contraception. ESSURE (58565) and HSG (58340, 74740) are most effective and the least invasive procedure for permanent birth control. These procedures are safer , require less anesthesia and have quicker recovery than tubal ligation.

Sincerely,

Moses Hochman, MD

In response to the 1115 Waiver renewal comments submitted by Dr. Moses Hochman on 5/15/2013, DMMA has the following response:

Thank you for your comments.
