Enterprise Standards and Policies

<http://dti.delaware.gov/information/standards-policies.shtml>

In late 2003, the Technology and Architecture Standards Committee (TASC) was created. In cooperation with the IRM subcommittee on policies and standards, a process was adopted to develop enterprise standards that are comprehensive and current. The standards are to be drafted in a collaborative way and periodically reviewed.

In 2005, enterprise policies were added to the TASC responsibilities. To date, over 30 enterprise standards and policies have been created and approved by the State CIO.

In order to join an email list that sends you an email notification when a change has been made to the State of Delaware's enterprise standards or policies, please send an email to 'join-tasc_policies@lists.state.de.us' and respond to the confirmation email.
