INSTRUCTIONS FOR COMPLETION OF THE DELAWARE ADULT HIV/AIDS CASE REPORT FORM
March 2016

The HIV/AIDS case report form (CRF) is Delaware’s version of the CDC 50.42A and now replaces all prior HIV and AIDS case report forms for HIV infection or Stage 3 HIV. (A separate white form CDC 50.42B is used for reporting HIV/AIDS in persons under age 13.) More copies of the form may be obtained through your local health department or by contacting the HIV Surveillance Section at either 302-744-1015 or 302-744-1016. Forms and these directions may also be found at http://www.dhss.delaware.gov/dhss/dph/dpc/hivsurveillance.html

All patients with evidence of HIV infection, including Stage 3 HIV (AIDS), should be reported within 7 days of diagnosis, including a physician diagnosis based on history and symptoms. Stage 3 HIV cases (2014 CDC HIV case definition) include all patients with a history of HIV infection who also have documented CD4 levels which establish Stage 3 HIV (AIDS) as follows:

- CD4+ lymphocyte count <750 cells/µL or a CD4+ <26% of total lymphocytes for persons less than one year of age.
- CD4+ lymphocyte count <500 cells/µL or a CD4+ <22% of total lymphocytes for persons between 1-5 years of age.
- CD4+ lymphocyte count <200 cells/µL or a CD4+ <14% of total lymphocytes for persons between equal to or greater than 6 years of age.

Stage 3 HIV indicator diseases listed in Section X of the form must also be reported. **All required information has been emphasized below in bold print.**

Completed forms should be mailed to:
Division of Public Health
Att: Surveillance
417 Federal St
Dover, Delaware 19901

When mailing the form, please address the envelope to the HIV Coordinator or other designated local contact, and mark the envelope "Confidential" and "To Be Opened by Addressee Only."

SIDE 1

For confidential testers, enter the patient’s full name, social security number, phone number and current address. If available, record a.k.a, aliases, etc. in Section XIII Comments.
Please provide contact information for the individual who could be reached to answer questions concerning the information provided on the CRF. This person can be a physician, nurse, or any confidentiality-trained staff member with knowledge to interpret and access the patient’s medical information.

Please provide the physician, facility and phone where the patient is currently receiving care. If possible, provide medical record number and the date the patient was first seen at this facility and the date of their last (most recent) visit to the facility.

Check the appropriate box under Diagnostic Status whether you are reporting "HIV Infection (not AIDS)" or "Stage 3 HIV (AIDS)" (the patient meets the 2014 CDC HIV definition; see introduction to these instructions for the definition of Stage 3). All information that follows should correspond to the diagnostic status specified (HIV or Stage 3 HIV). "Residence at Diagnosis" field should reflect when HIV or Stage 3 HIV was first diagnosed.

Note: Ethnicity and race are two different variables. The appropriate box must be checked for each variable. If applicable, more than one race may be selected.

Enter the name of the provider and the address, city and state of the facility where the patient was first diagnosed (as HIV positive or as Stage 3 HIV (AIDS), accordingly). Facility type should also be specified with public clinics, counseling and testing sites and community based organizations written in as “other.”

Check ALL boxes in appropriate columns. Indicate dates of first and last blood transfusion if applicable. Write in specific occupation if patient is a healthcare worker.

Please provide any additional information which may assist public health officials with the location, demographic background and behavioral history of the patient.
**SECTION IX. Documented Laboratory Data**

Please indicate the first documented positive, negative and/or indeterminate HIV test result. Include specific AG/AB, EIA, Western blot and other virus detection tests.

Please record both the earliest and most recent viral load tests and indicate the test type (00-06).

Please record the CD4 cell count and percent closest to the current diagnostic status as well as the first CD4 count/percent that may establish Stage 3 HIV as follows:

- CD4+ lymphocyte count <750 cells/µL or a CD4+ <26% of total lymphocytes for persons less than one year of age.
- CD4+ lymphocyte count <500 cells/µL or a CD4+ <22% of total lymphocytes for persons between 1-5 years of age.
- CD4+ lymphocyte count <200 cells/µL or a CD4+ <14% of total lymphocytes for persons between equal to or greater than 6 years of age.

Include dates of all tests.

Test date refers to the date of the test result.

If laboratory documentation of a positive HIV test is unavailable in the medical record, enter the date of physician diagnosis of HIV infection. A physician diagnosis is made by clinical and/or laboratory evaluation and should be clearly documented (e.g., in progress notes). Prescription of anti-retroviral drugs is sufficient evidence of a physician diagnosis of HIV infection.

**SECTION X. AIDS Indicator Diseases**

Please indicate whether the clinical record was reviewed. For Stage 3 reports, check all known indicator diseases and enter dates of diagnosis. Specify whether presumptive or definitive. (Presumptive diagnoses are generally based on specific laboratory methods, while presumptive diagnoses are those made by the clinician. A complete description may be found in the MMWR supplement RR-17, Vol. 41, December 18, 1992). Additional information is found in MMWR Vol. 63. No. 3, April 11, 2014, Revised Surveillance Case Definition for HIV Infection.

**SECTION XI. Treatment/Services Referrals**

Complete all partner services questions. They are: “Has the patient been informed of their HIV infection?” and “Who will counsel the patient’s partners about their HIV exposure?” (both found within the bolded box in this section).

For patients diagnosed with HIV, please check a box under HIV that corresponds to the primary method that the patient’s HIV care will be reimbursed. For patients diagnosed with Stage 3, please check a box under Stage 3 indicators that corresponds to the primary method that the patient’s Stage 3 care will be reimbursed.

If you are aware of a clinic-based or clinical trial in which the patient participates, please indicate it by name.

Enter whether referrals have been made for HIV medical services and/or substance abuse treatment services.
For women, list all known obstetrical information as requested. **Please indicate whether the patient is currently pregnant and list their EDC or due date.** Provide birth information, if applicable, for their most recent birth: child's date of birth and address of birth hospital. Enter "home birth" if born at home and include the full name of the child.

Please add any additional laboratory, clinical, or partner counseling and referral service information here.
