PREFACE

This is the twenty-second edition of the Delaware Nursing Home Utilization Statistical Report. The source for all information for this document is monthly utilization statistical reports by Delaware nursing homes submitted to the Bureau of Health Resources Management.

The data in this report does not include Intermediate Care Facilities for the Mentally Retarded (ICFMR). ICFMR facilities provide active treatment services to people with mental retardation and other related conditions causing adaptive behavior similar to that of the mentally retarded person and is manifested before the person reaches the age of 22.

Note:

- Percentages may appear as less than 100 percent due to rounding.
- See appendix A for recent changes in facility names and/or number of licensed beds.

SUMMARY

This report presents characteristics of Delaware nursing homes and their patients. While focusing on information from 2007, the Summary presents various data from 1997 through 2007. Information generally relates to the following:

- (1) Facility characteristics (number of homes and beds by ownership)
- (2) Utilization data (patient days, occupancy, admissions and discharges)
- (3) Patient characteristics (age, sex, source of payment)

Facility Characteristics

The number of nursing homes in the state increased from 45 in 2006 to 47 in 2007. The number of licensed beds increased from 4,756 in 2006 to 4,934 in 2007. Of the total beds, approximately 83.9 percent were privately owned in 1997, increasing to 87.3 percent in 2007. The percentage of beds in public facilities decreased correspondingly from 13.7 percent to 12.6 percent.

Patient days in the state increased by 1.4 percent between 2006 and 2007. By county, there was a 2.6 percent increase in New Castle, a 2.4 percent increase in Kent and Sussex and a 0.4 percent decrease in Sussex. The public facilities experienced a decrease of 1.0 percent.

A summary table of patient days in the state from 1997 to 2007 is displayed below:

Private facilities in Kent County decreased from 92.0 percent to 76.5 percent. Private facilities in Sussex County increased from 88.7 percent to 89.1 percent. Public facilities decreased from 63.0 percent to 62.5 percent.

Admissions

There was an increase of 32.1 percent in admissions between 1997 and 2007 (from 6,854 to 9,055). Admissions to private facilities increased by 33.4 percent while admissions to public facilities decreased by 27.0 percent.

The largest number of admissions to Delaware nursing homes was for individuals aged 75-84 (37.4 percent) and for individuals age 85 and older (32.7 percent).

According to the Delaware Population Consortium, Populations Projections Series, dated October 31, 2008, in 2007 there were 42,303 Delawareans between ages 75 and 84 and 15,978 Delawareans age 85 and up. Admissions to Delaware nursing homes for individuals within these age groups were 3,393 and 2,963 respectively. Keeping in mind that not all persons admitted to Delaware nursing homes were Delawareans – some came from other states – it is probably fair to estimate that about 7.5 percent of those in the 74-85 age group and 18 percent of those age 85 and older were at some point in time admitted to a nursing home. Clearly, the likelihood of being admitted to a nursing home increases with age.

Admissions cont.

During 2007, 87.6 percent of the admissions to Delaware's private facilities were from hospitals and 6.5 percent were from the patients' or relatives' homes. In public facilities, 57.5 percent of admissions were from hospitals during 2007 and 19.5 percent from patients' or relatives' homes.

Age of patient admission varies by race. Blacks tend to enter nursing homes in Delaware at a younger age than whites. Of the black admissions in 2007, 44.4 percent were less than 75 years of age, compared to 26.2 percent for whites.

The following chart identifies the percentage of patients admitted to Delaware nursing homes by race within specific age groups. Example: 9.7 percent of all white admissions were under the age of 65 and 21.1 percent of all black admissions were under the age of 65.

Black	21.1	23.2	35.5	20.1
Delaware Total	11.9	17.9	37.4	32.7

Although Blacks are admitted to Delaware nursing homes at a younger age the percent of black admissions is lower than white admissions in all age groups as indicated on the chart below. This chart identifies the percent of all patients admitted to Delaware nursing homes in the year 2007 by race and age. Example: 7.7 percent of all admissions under the age of 65 were white and 3.9 percent were black.

Discharges – continued

The number of patients discharged increased from 6,790 in 1997 to 8,833 in 2007. The proportion of patients discharged from private facilities to a patient’s own home or to a relative’s home increased from 46.2 percent in 2006 to 47.27 percent in 2007. During the same period, patients discharged due to death increased from 15.9 percent in 2006 to 16.3 percent in 2007.

Comparing public and private facilities, patients in public facilities are less likely to be discharged to home or hospital and more likely to be discharged due to death.

Sources of Payment

The source of payment for nursing home care varies markedly between the private facilities and public facilities. In private facilities, while approximately 45.6 percent of the residents in 1997 had Medicaid as the source of payment, 52.5 percent of the residents in 2007 had Medicaid as the source of payment. About 27.1 percent of patients in private facilities were self-pay in 2007. In public facilities, on the other hand, 77.5 percent of the residents had Medicaid as their source of payment in 2007 while only 17.7 percent were self-pay.

Medicare is not a major payer of nursing home care. In 2007 Medicare was the source of payment for 15.7 percent of the patients in private facilities and 0.5 percent in public facilities. However, the percent of Medicare patients has changed considerably since 1997 when the percentages of patients with Medicare as a source of payment were 9.1 percent for private facilities and 1.2 percent for public facilities.

The average percentage of patients by source of payment for the state during 1997 to 2007 is displayed below:
