

2010 COMMUNITY PROFILE FOR DELAWARE: DATA BY SUB STATE PLANNING AREA October 2010

**DESCRIPTION: Sub state/Community Level Epidemiologic
Profile for Substance Abuse Consumption and
Consequences Data on Youth and Adults for Delaware**

Prepared by:

*The University of Delaware Center for Drug and Alcohol Studies
&
Its State Partners*

For

**The Delaware SPF-SIG Program,
The Delaware Division of Substance Abuse and Mental Health,
&
The Delaware Drug and Alcohol Tracking Alliance**

Sponsored by Award SP015607 to the Division of Substance Abuse and Mental Health, Delaware Health and Social Services, from the Center for Substance Abuse Prevention, Substance Abuse and Mental Health Services Administration

2010 PROFILE BY SUBSTATE PLANNING AREA

1. INTRODUCTION

1.1 Purpose of 2010 Delaware Substate Epidemiological Profile

The Division of Substance Abuse and Mental Health (DSAMH), the Single State Agency (SSA) for mental health/substance use conditions in Delaware is pleased to present this report from the statewide epidemiological outcomes workgroup (SEOW). This annual Profile brings together the most recent available information related to Delaware youth, families, and adults that is relevant to understanding, planning and intervening with Delawareans at risk for substance abuse, violence, and other risk factors. More importantly, it presents data, where possible, that are available for smaller areas than the state as a whole -- by county or "substate planning area" or even by community. Federal regulations have required and Delaware has established four substate planning areas for the state. These are:

1. The City of Wilmington;
2. The remainder of New Castle County;
3. Kent County; and
4. Sussex County

Reporting of Incidence, prevalence and outcome measures for each of these substate planning areas and surveillance of change will become an increasing requirement of federal and state programming in the future.

This report focuses on data that can be provided by substate areas. More extensive data for substance abuse indicators for the state as a whole are available in the annual series of State Epidemiological Profiles that are also available at the DDATA website. Because of Delaware's small size, many indicators are not reliable at a substate or community level and can only be reported at the state level. The 2010 Substate Profile has two main purposes:

First, the Profile continues the series of data reports begun in 2008, as part of Delaware's mandate from the Federal Substance Abuse Mental Health Services Administration (SAMHSA), to assemble, analyze and report on the best available data for state and substate surveillance of substance use/abuse incidence, prevalence, and related data for Delaware. Staff of the Delaware SEOW, the Delaware Drug and Alcohol Tracking Alliance (DDATA), are charged with producing and updating this resource. The Workgroup's responsibilities include collecting and improving upon the sources available for National Outcomes Measures (NOMS) that will meet SAMHSA and other federal reporting requirements. In addition, the Workgroup collects, collates, makes accessible and distributes alcohol, tobacco, and other drug (ATOD) data within the state for use by other Federal agencies (e.g., Office of National Drug Control Policy), other State agencies (e.g., Division of Public Health, Division of Prevention and

Behavioral Health Services, Department of Education), Foundations (e.g., Nemours, the Casey Foundation, the Robert Wood Johnson Foundation), and for informing communities and organizations statewide.

Second, the Profile is meant to serve as a reference point for establishing the need for and subsequent changes in prevention or intervention programming in Delaware substate planning areas. This is particularly relevant this year to communities and groups that will be applying for planning or implementation awards under the Fall 2010 RFP being issued by DSAMH as part of the new Strategic Prevention Framework State Initiative Grant from SAMHSA. It will also be useful to communities and groups applying for awards under the Fall 2010 RFP also being issued by DSAMH as part of the Substance Abuse Prevention Block Grant. Data will also be useful to communities directly applying for awards such as the federal Safe and Drug Free Communities (SDFC) Grant Program, the Division of Public Health Tobacco Prevention and Control Programs, and other initiatives that may be issued by federal, state and foundation sources.

About one-third of this Profile consists of information from Delaware youth surveys that has only recently been available by substate planning area and in some cases by smaller community breakdowns (Section 2 of the Profile). These data are the most rich and most timely (mostly 2009) because they include large samples and much of it comes from Delaware sources. The next third of the Profile consists mostly of data that are available for adults (Sections 3). Here the data sources, sizes of the samples, and recency (mostly from 2006-2008) of the data are more limited. Much of it comes from national sources such as the National Household Survey of Drug Use and Health (NSDUH) and the Behavioral Risk Factor Surveillance System (BRFSS). Section 4 of the Profile provides youth institutional data from the Department of Education and the Division of Prevention and Behavioral Health Services. Section 5 provides some additional data specific to Wilmington, though the Hope Commission data is beginning to be dated. Finally, Section 6 of the Profile provides leads and locations of additional data from the sources used here as well as other data sources that may be helpful in addressing issues of need and evidenced-based program compatibility.

1.2 EXECUTIVE SUMMARY

The Delaware Substate Profile for 2010 builds on the earlier Substate Reports for 2008 and 2009 (available at www.udel.edu/delawaredata). It incorporates newly available data from the School Surveys, NSDUH, BRFSS, and Kids Count. The major goal of SPF-SIG and the State Strategic Plan in the upcoming Year is to begin to put data into practice in directing emphasis for evidenced-based programs practices and principles being implemented in Delaware to address the identified prevention priorities.

For the SPF-SIG and its Strategic Plan, the priorities are:

Reduce past month alcohol misuse and abuse of Delaware residents 12-25 years of age. Indicators of change may include, but are not limited to: a decrease of underage and binge drinking (consumption); and decrease in alcohol related traffic crashes, death, and/or injuries (consequences); and a secondary priority that communities may include with substantive data to support its inclusion.

For the State Prevention Block Grant Program, the priorities are:

To prevent the onset, use, and abuse of the following Prevention Priorities for Delawareans across the lifespan: a) Alcohol, b) Marijuana, c) Prescription Drugs, and d) Heroin.

It is apparent that alcohol prevention, both consumption and consequences are the first priority for both planned RFP Programs. And an examination of the data in this report supports the conclusion that there are not major differences in alcohol abuse, both for consumption and consequences, by substate planning area, and no discernable patterns for youth alcohol abuse statewide when examined by zipcode. This does not suggest that alcohol is not a problem in Delaware. In fact, all data indicate that it is the major problem, and that its influences are endemic and statewide and not focused geographically. Examination of earlier data going back to the mid 1990s for adults and to 1989 for youth, support this conclusion as well. The data presented in the tables and charts below lend support to this conclusion.

The data from Section 2 summarize alcohol indicators, both consumption and consequence from the 2009 Delaware school survey by substate planning area, and the percentages reported reveal only five significant differences among the potential 48 comparisons. These significant differences relate to higher alcohol for Sussex County 11th graders in the school survey. However as seen in Section 3, the NSDUH finds

youth aged 12-20 in Sussex County among the lowest areas in the state for past month use and binge drinking, so the data are not consistent for high risk areas for youth.

The data for adults from the NSDUH and from the BRFSS in Section 3 show no significant differences in alcohol use or binge drinking by substate areas. In general Delaware is higher than the US as a whole and higher than the Southern states but lower than the Northeast states. NSDUH data in Section 3 also report on dependence and need for treatment, not strictly prevention measures, but SAMHSA considers them potential indicators for alcohol prevention efforts. Delaware actually reports lower estimates for alcohol dependence, abuse, and unmet need for treatment than national averages, and there are no significant differences by substate area.

Finally, there are data for youth alcohol use, binge use, and alcohol involved underage crashes mapped statewide In Sections 2.1 and 2.4. Although there are some zipcodes with higher prevalences, and some areas with higher concentrations of crashes, they do not correspond to substate planning areas. In fact a close examination of the intervals, shows that consumption and binge use among youth is high statewide, and alcohol related crashes are consistent with commercial areas with no major distinction about the size of the communities or the area of the state.

In terms of other drug use than alcohol, Delaware is no longer reporting very high rates of substance abuse, compared to national indicators, and in the most recent 2008 data, Delaware has dropped below the national mean on a number of NSDUH indicators, particularly for youth and young adults. This was not always the case. When the first State NSDUH estimates for 2000 were released by SAMHSA's Office of Applied Studies, Delaware appeared to have the highest youth substance use rates in the country and one of the highest overall rates. Subsequent improvements in sampling have suggested that, on most indicators, Delaware now is very near the national average, and does not rank in the top 20% for any of the key NSDUH indicators.

There are three areas that can be noted where Delaware remains higher than national estimates on consumption indicators: First, alcohol use by underage and young adults; second, marijuana use, particularly for young adults; and third, other illicit drug use, this time over the life course. There are indications from collateral data sources that much of the other illicit drug use reported in the NSDUH involves misuse of prescription drugs. However, even when Delaware's rates exceed national averages, as in these areas, the rate of use of these other illicit substances does not vary appreciably by substate area. In fact, except for cigarettes and other tobacco products, there is little variation in substance use in Delaware by substate area.

The most positive prevention effort in Delaware in the last decade has been among cigarette and other tobacco use where Delaware has moved from above to below national averages, and the decline has been particularly pronounced among youth and young adults. Delaware moved from steeper rates of increase and higher overall rates of youth smoking in the 1990s to steeper rates of decline and lower averages than national numbers in the most recent estimates. Tobacco prevention and cessation has

been a national priority, and the effects can be seen in the national numbers. It is one of the first great public health success stories of the 21st century. Delaware has had an exemplary Tobacco cessation and prevention effort, has devoted significant resources to the effort, and has made the approach multifaceted, and it shows in Delaware's better than average success in this national success story. Interestingly, and instructive for community efforts, it is also the one drug that shows geographical variation in use within the state by substate planning area.

These findings are presented in this Profile without pointing to potential policy implications. However, the data were used to set priorities for the state's strategic prevention plans, and referring to these data will be important to those responding to RFPs, both in establishing the need for programs proposed, but also in measuring change that may be due to new programs, policies, and/or principles that contractors may implement. It is expected that this Profile will continue to be updated and expanded in the coming years as the State seeks to use these data and other sources to help establish state priorities for the future and possibly new programming initiatives.

2. DELAWARE YOUTH SURVEY DATA BY SUBSTATE AREA

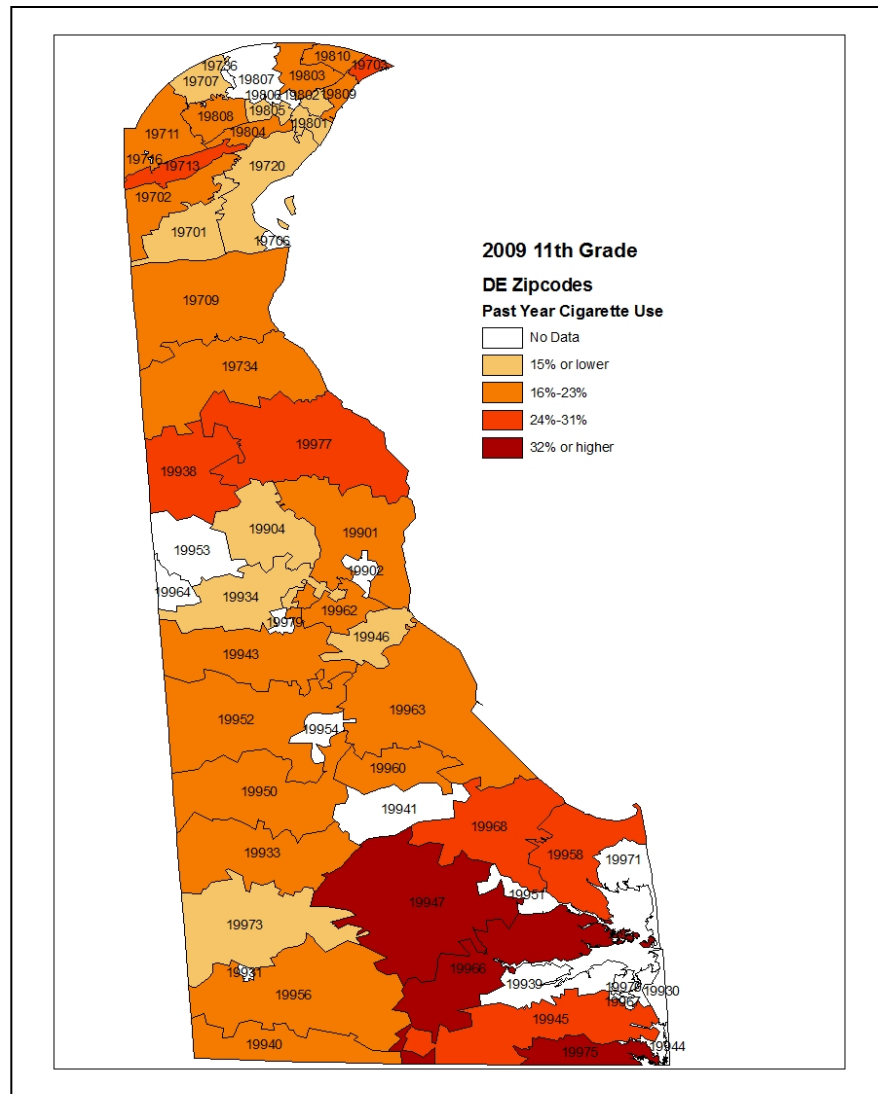

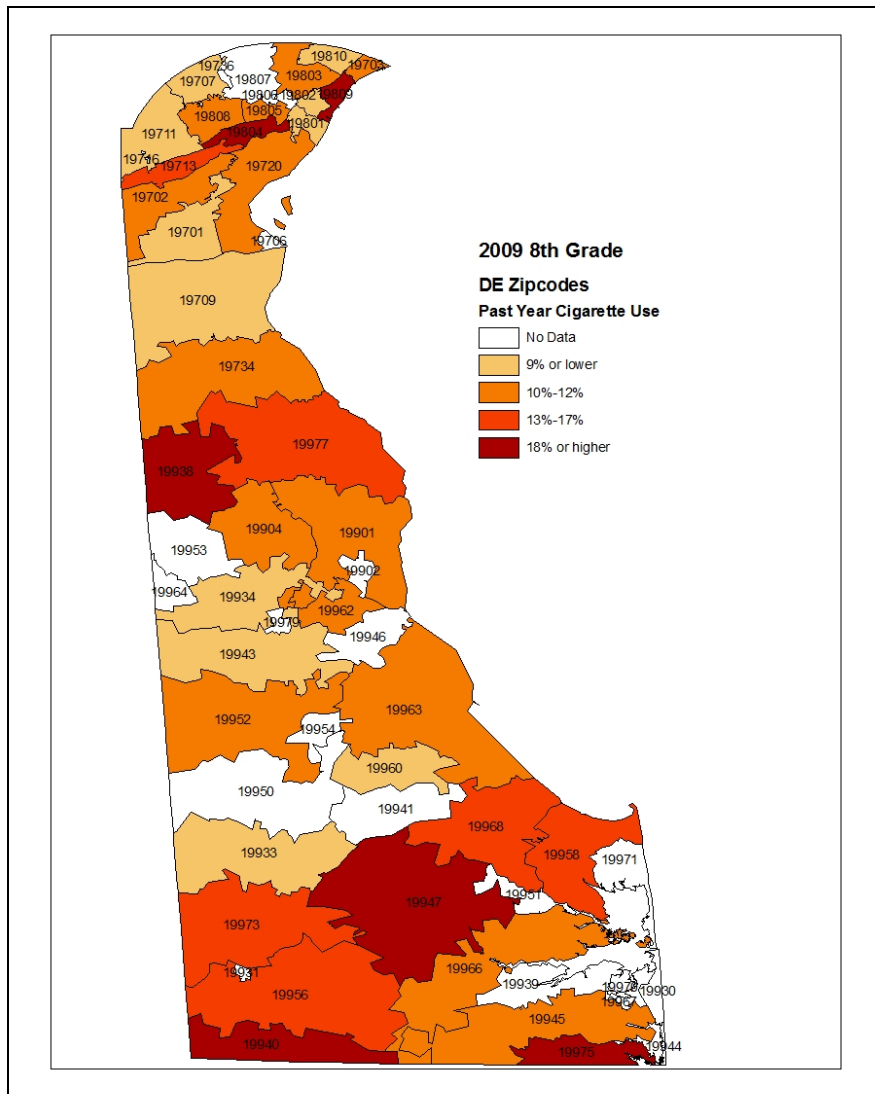

The following section includes data from the Delaware School Surveys that has been reported by substate planning area. The information is broken down into four categories of “individual level” attitudes and behaviors, “family level” data, “school level” data, and “neighborhood level” data. Please note that since Zipcode and City identifying information are not available for 5th Grade data, there are no separate tables or charts for Wilmington 5th graders. Wilmington-specific information is provided for 8th and 11th graders. More information on these surveys is available in Section 6 of this Profile below.

DELAWARE YOUTH SURVEY DATA BY SUBSTATE AREA

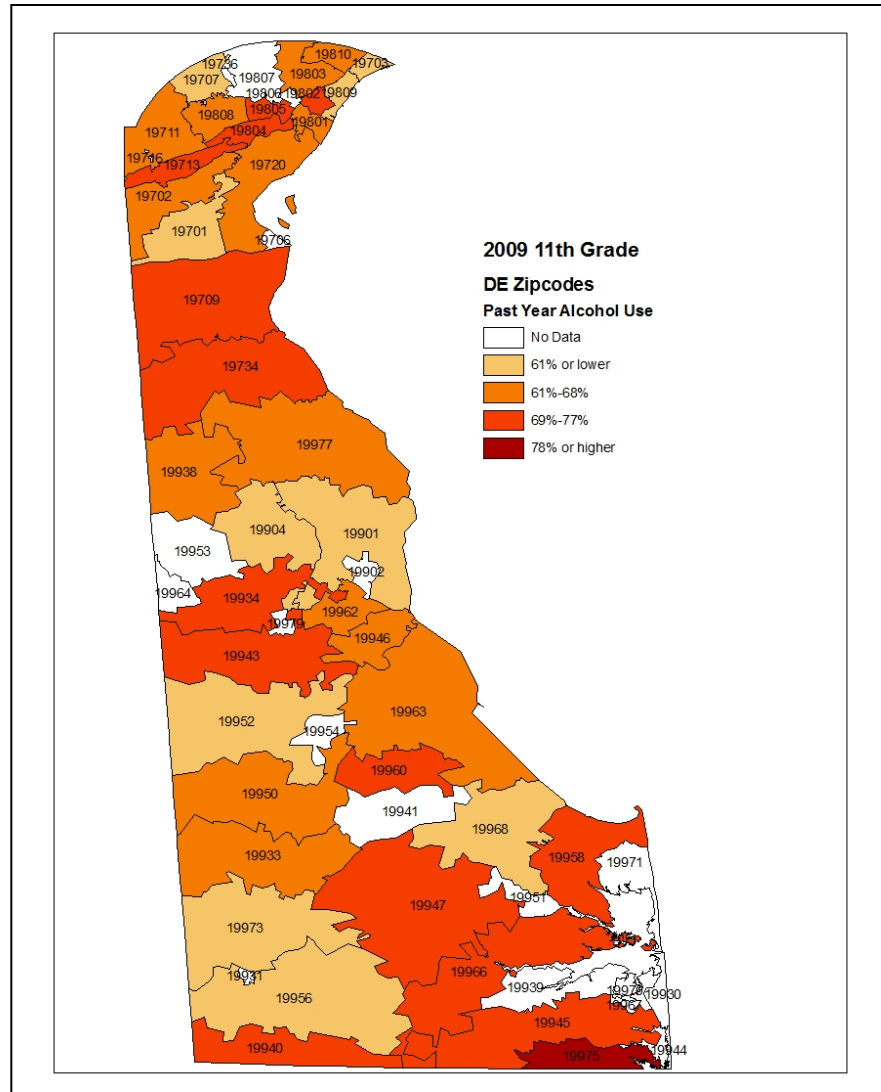

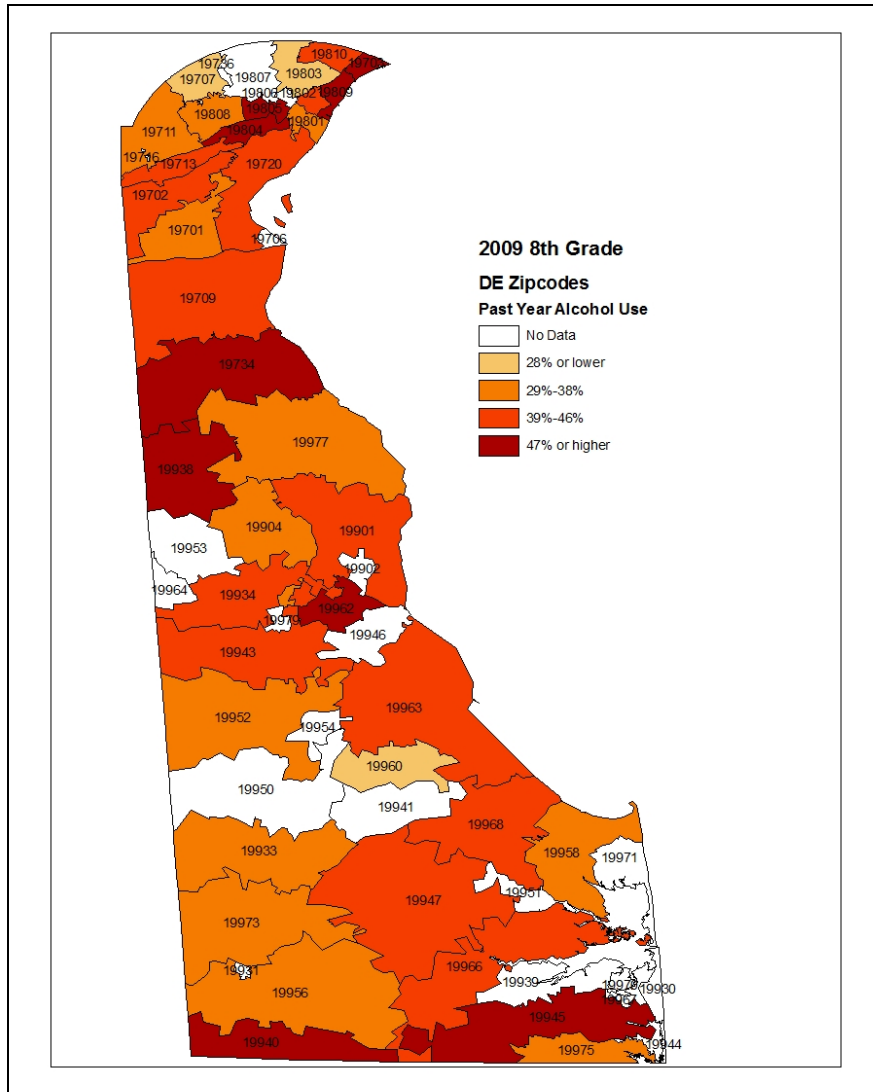

2.1 Individual Level Data

The following section includes data from the Delaware School Surveys that relate to youth self-reports of their own behaviors and attitudes related to substance use, violence, and other risk and protective factors. The first pages relate to substance use and are broken down by Zipcode and mapped. The following charts are by substate planning area. Again, please note that Zipcode and City identifying information are not available for 5th Grade data, so there are no separate tables or charts for Wilmington 5th graders. Wilmington-specific information is provided for 8th and 11th graders.

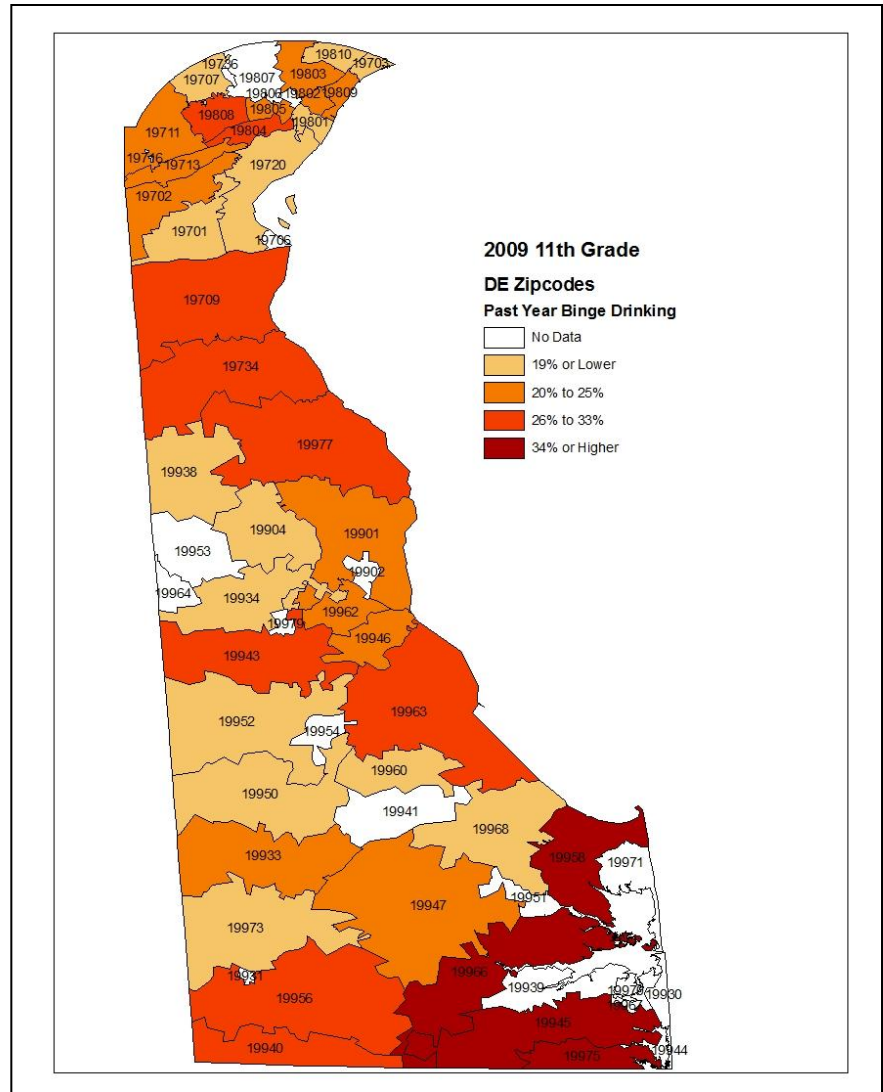

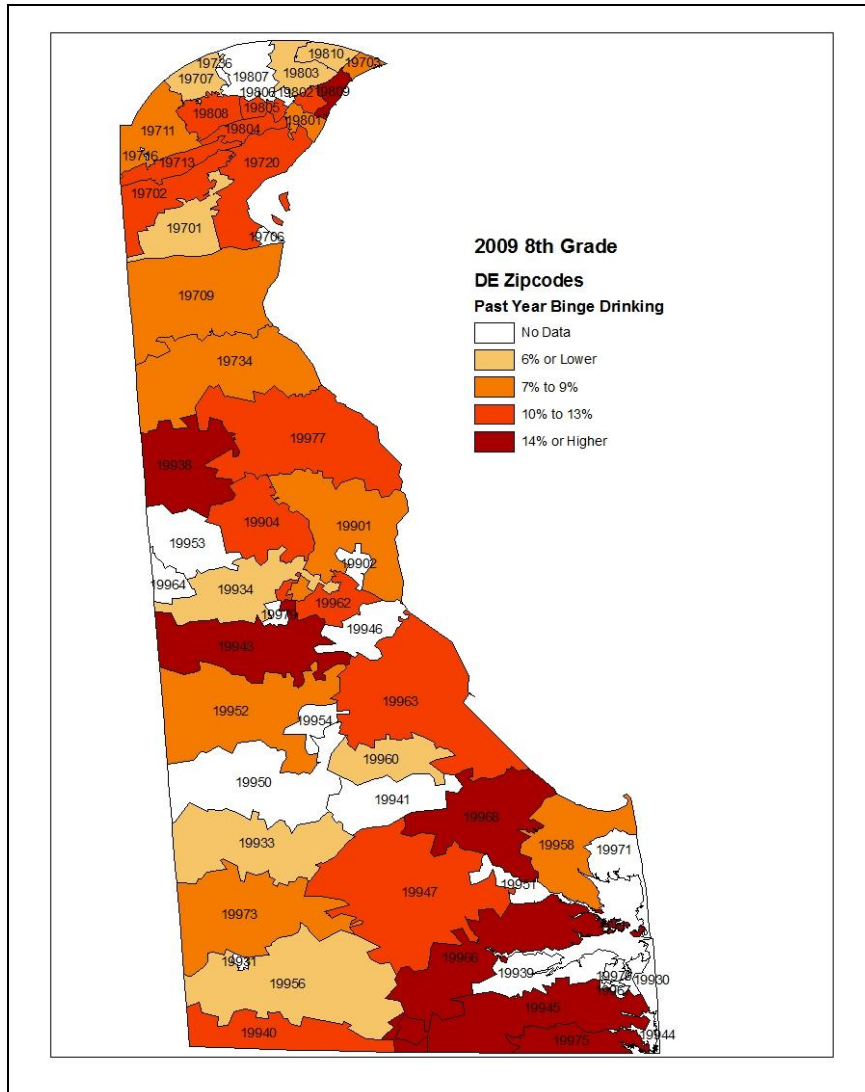

Past Year Cigarette Use Among Delaware 8th and 11th Graders by Zip Code, 2009

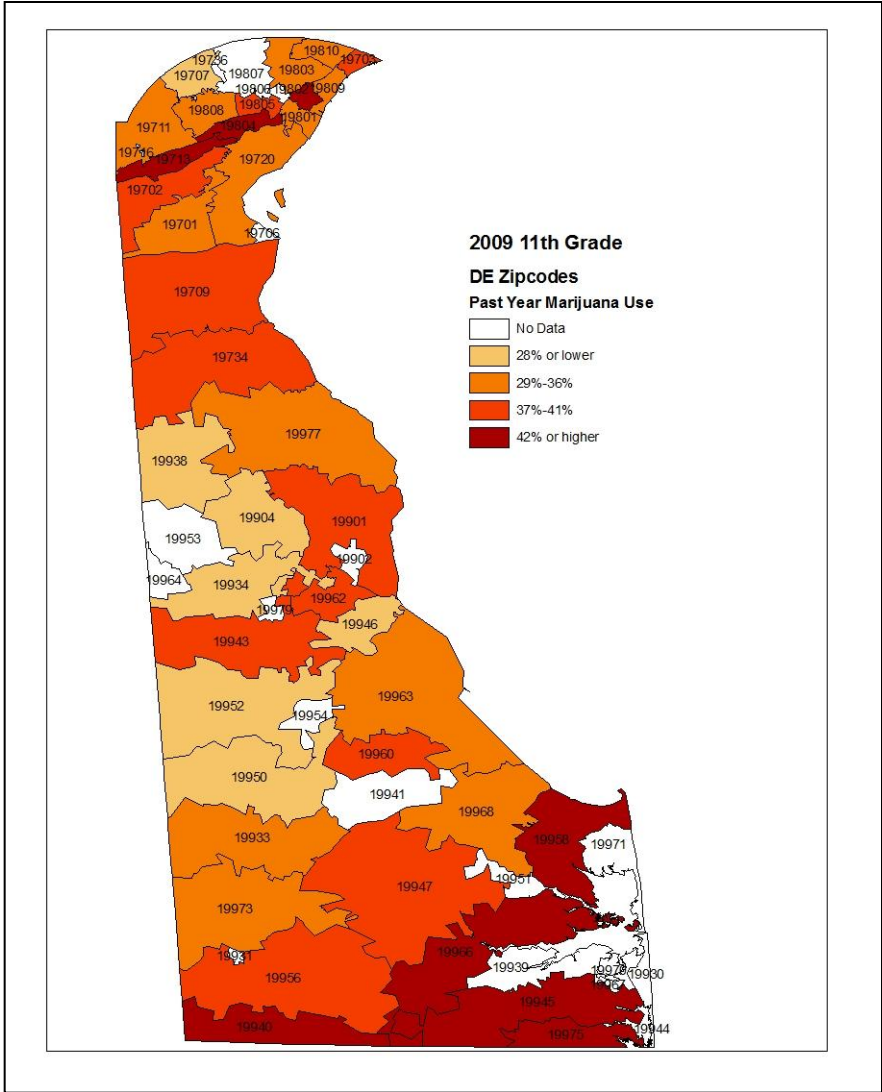

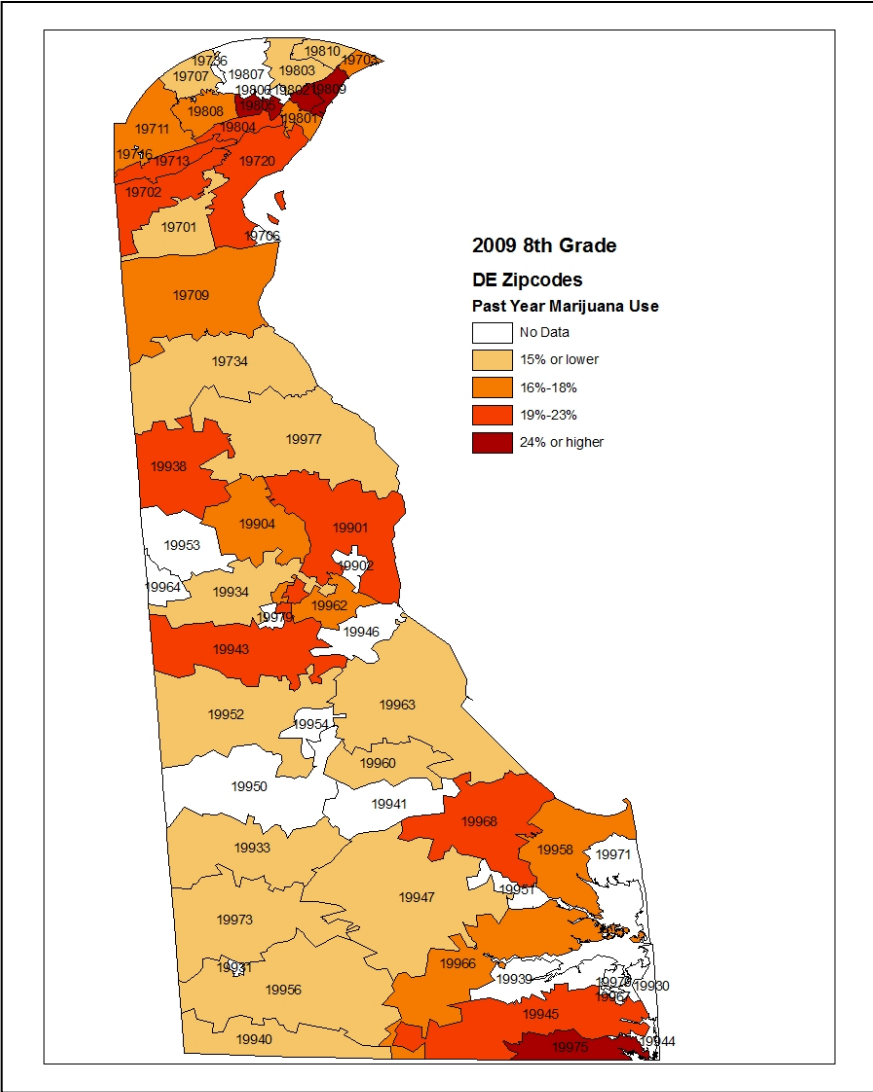

Past Year Alcohol Use Among Delaware 8th and 11th Graders by Zip Code, 2009

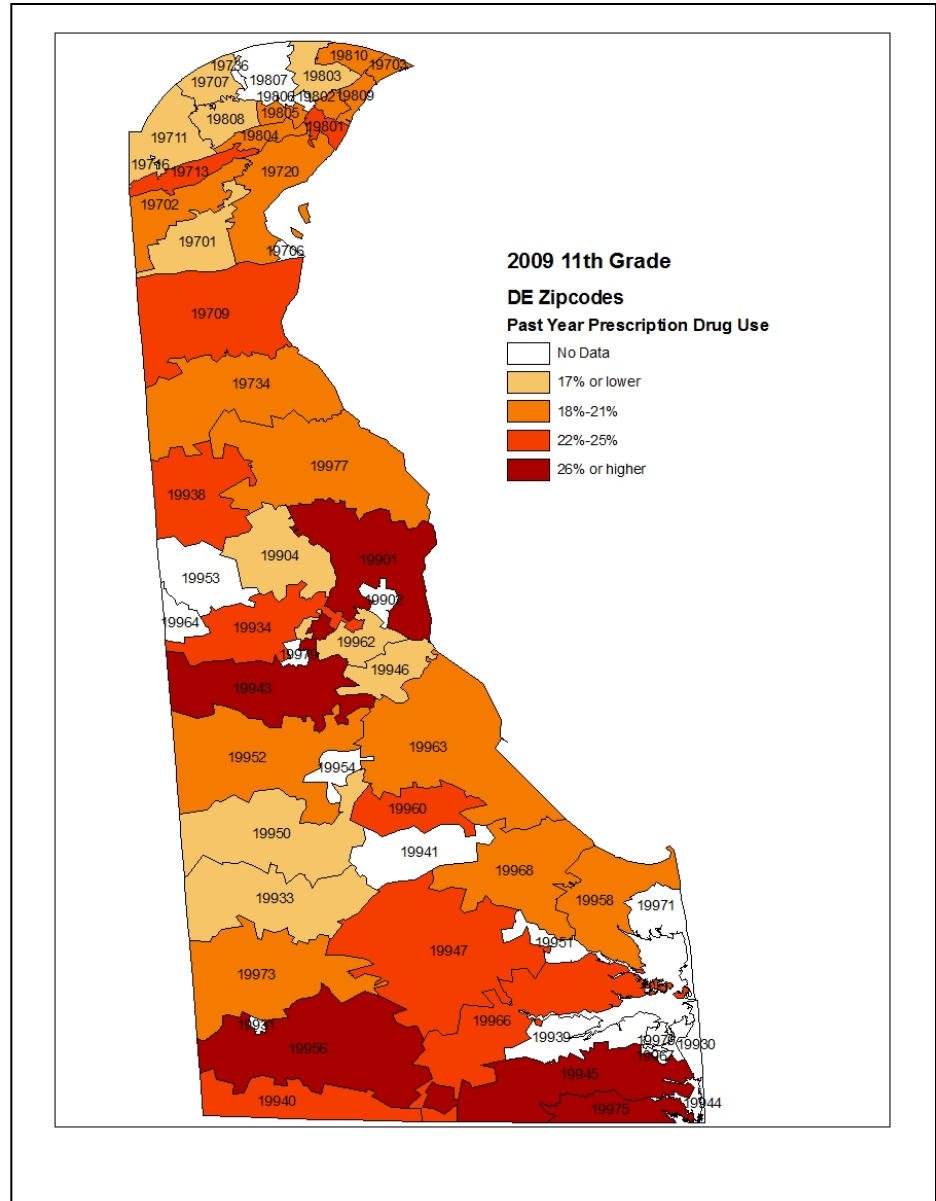

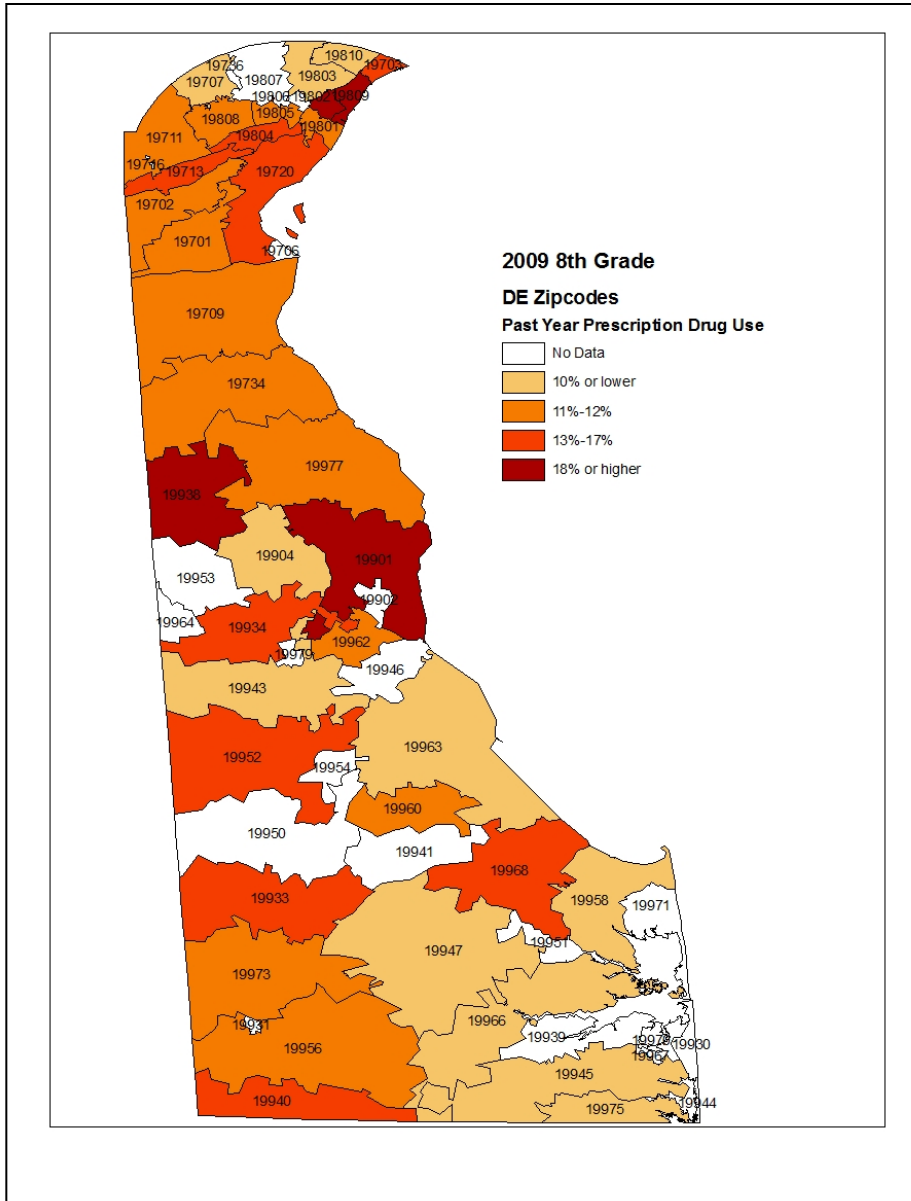

Past Year Binge Drinking Among Delaware 8th and 11th Graders by Zip Code, 2009

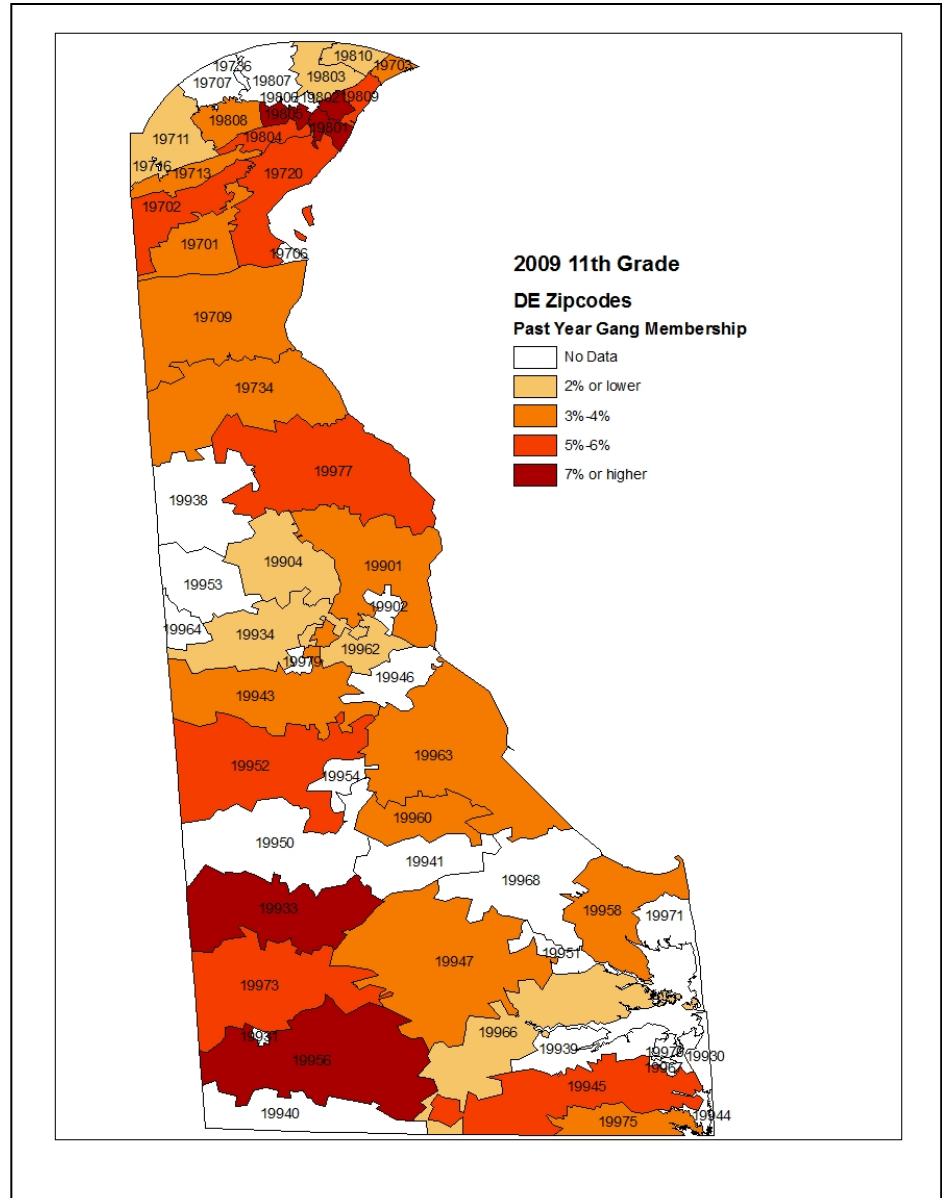

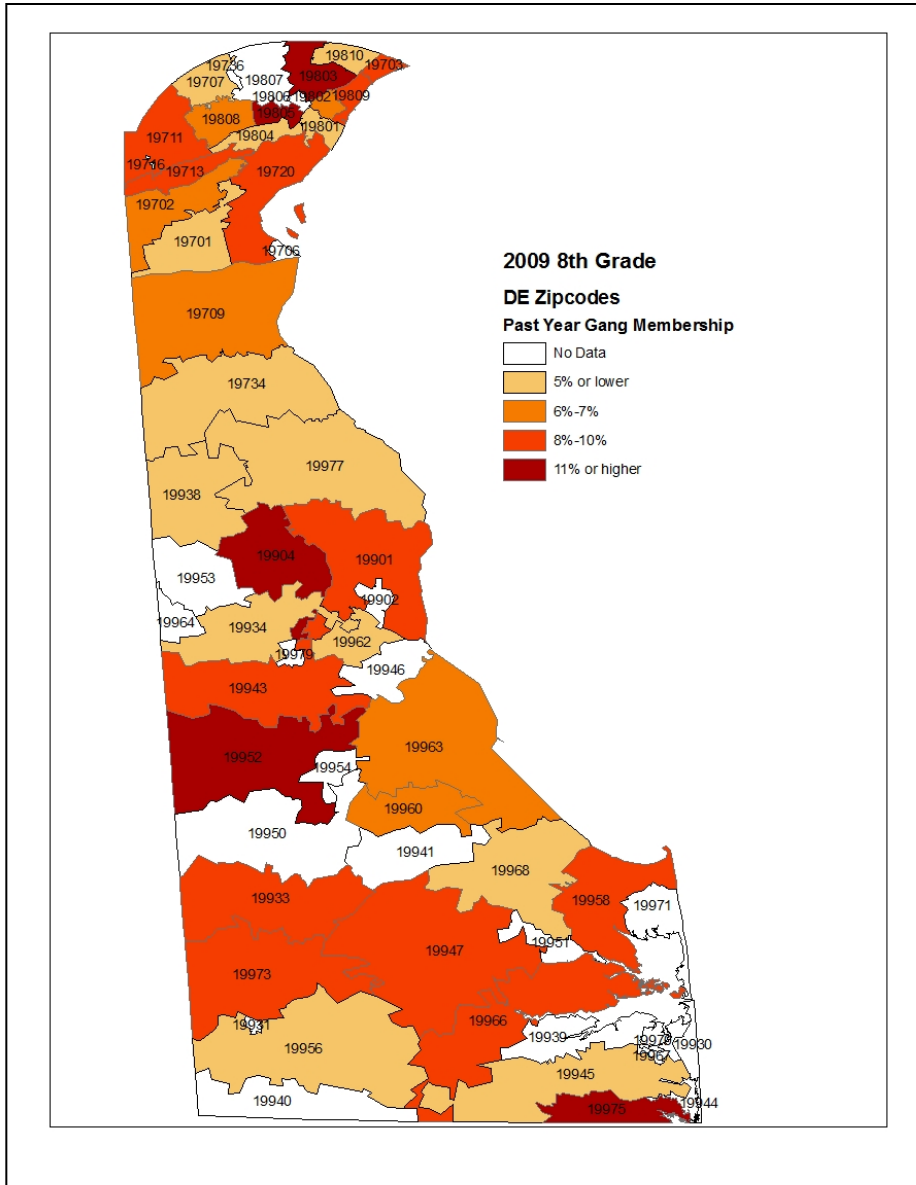

Past Year Marijuana Use Among Delaware 8th and 11th Graders by Zip Code, 2009

Past Year Prescription Drug Use Among Delaware 8th and 11th Graders by Zip Code, 2009

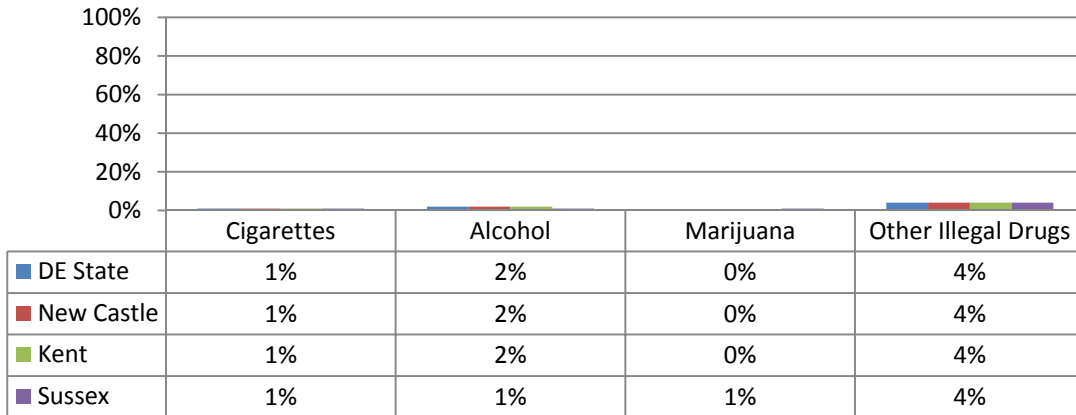

Past Year Gang Membership Among Delaware 8th and 11th Graders by Zip Code, 2009

Reported Substance Use by Delaware Public School Students, 2009

2009 5th Graders' Reports of Past Month Substance Use

2009 8th Graders' Reports of Past Month Substance Use

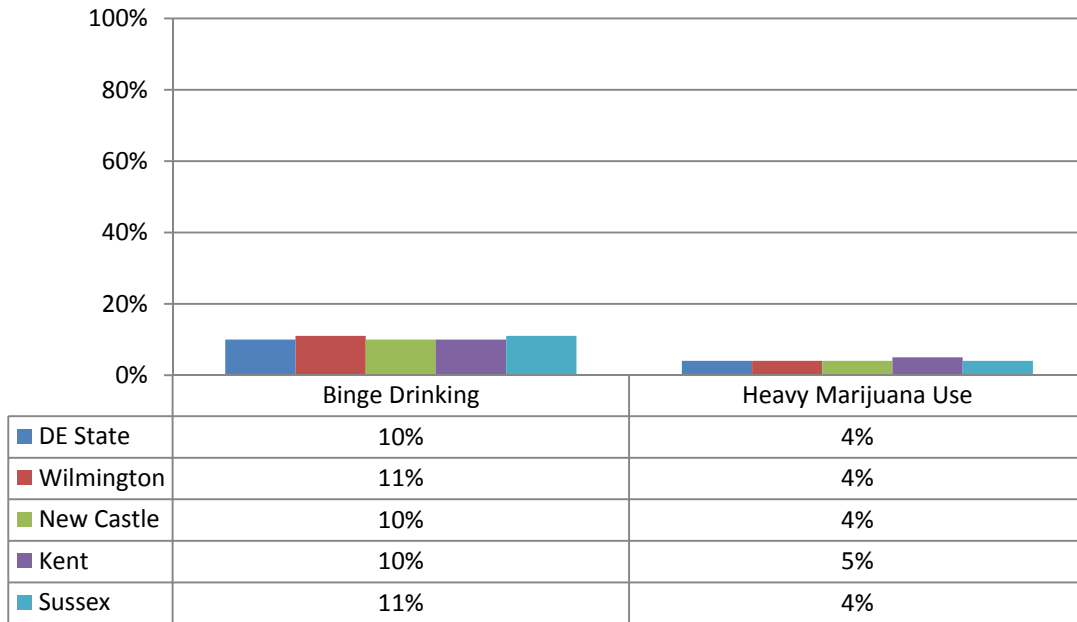

2009 11th Graders' Reports of Past Month Substance Use

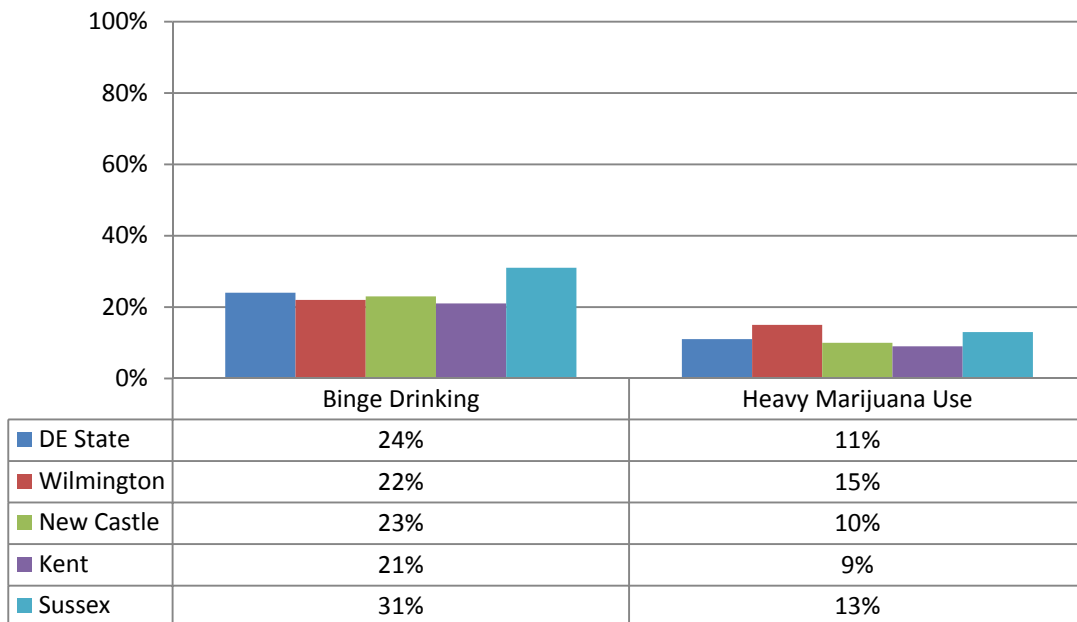

Source: 2009 Delaware School Survey, University of Delaware Center for Drug and Alcohol Studies

Reported Binge Drinking and Heavy Substance Use by Delaware Public School Students, 2009

2009 8th Graders' Reports of Binge Drinking and Heavy Substance Use

2009 11th Graders' Reports of Binge Drinking and Heavy Substance Use

Source: 2009 Delaware School Survey, University of Delaware Center for Drug and Alcohol Studies

Note: Binge use is defined as three drinks at a time in the last two weeks.

Heavy Use indicates more than six times in the past month.

Reported Perceptions of Risk in Substance Use by Delaware Public School Students, 2009

2009 5th Graders Perceptions of "Great Risk" in Substance Use

2009 8th Graders' Perceptions of "Moderate" or "Great Risk" in Substance Use

2009 11th Graders' Perceptions of "Moderate" or "Great Risk" in Substance Use

Source: 2009 Delaware School Survey, University of Delaware Center for Drug and Alcohol Studies

Reported Self-Disapproval of Substance Use by Delaware Public School Students, 2009

2009 8th Graders' Reports of Self-Disapproval of Substance Use
(percentage responding "wrong" or "very wrong")

2009 11th Graders' Reports of Self-Disapproval of Substance Use
(percentage responding "wrong" or "very wrong")

DELAWARE YOUTH SURVEY DATA BY SUBSTATE AREA

2.2 Family Level Data

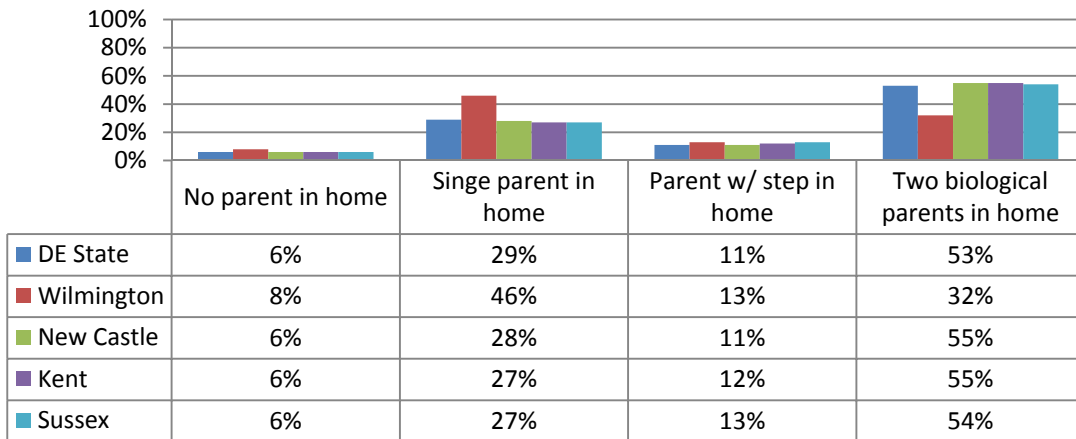

The following section includes data from the Delaware School Surveys that relate to youth self-reports of their family composition and of attitudes and behaviors related to their families and perceived attitudes of their parents. The following charts are by substate planning area. Again, please note that Zipcode and City identifying information are not available for 5th Grade data, so there are no separate tables or charts for Wilmington 5th graders. Wilmington-specific information is provided for 8th and 11th graders.

Reported Family Structure by Delaware Public School Students, 2009

2009 5th Graders' Reports of Family Structure

2009 8th Graders' Reports of Family Structure

2009 11th Graders' Reports of Family Structure

DELAWARE YOUTH SURVEY DATA BY SUBSTATE AREA

2.3 School Level Data

The following section includes data from the Delaware School Surveys that relate to youth self-reports of their attitudes and behaviors related to their school and to other kids at school. Information on perceived verbal abuse and violence as well as attitude about school rules and norms are provided. The following charts are by substate planning area. Again, please note that Zipcode and City identifying information are not available for 5th Grade data, so there are no separate tables or charts for Wilmington 5th graders. Wilmington-specific information is provided for 8th and 11th graders.

DELAWARE YOUTH SURVEY DATA BY SUBSTATE AREA

2.4 Neighborhood Level Data

The following section includes data from the Delaware School Surveys that relate to youth self-reports of their attitudes and behaviors related to their neighborhood and to other kids in their neighborhood. Information on perceived verbal abuse and violence are provided. The following charts are by substate planning area. Again, please note that Zipcode and City identifying information are not available for 5th Grade data, so there are no separate tables or charts for Wilmington 5th graders. Wilmington-specific information is provided for 8th and 11th graders.

Reported Violence from Kids in Neighborhood by Delaware Public School Students, 2009

2009 8th Graders' Reports of Violence and Threats From Kids in the Neighborhood

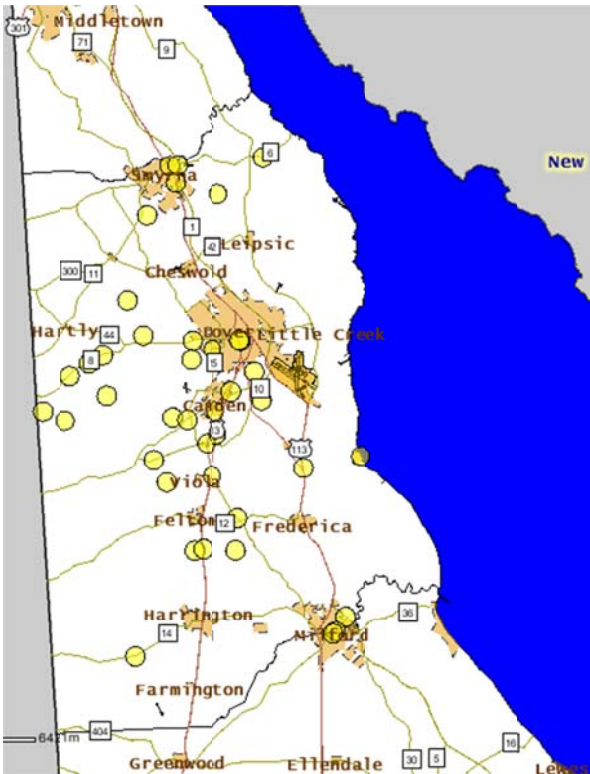

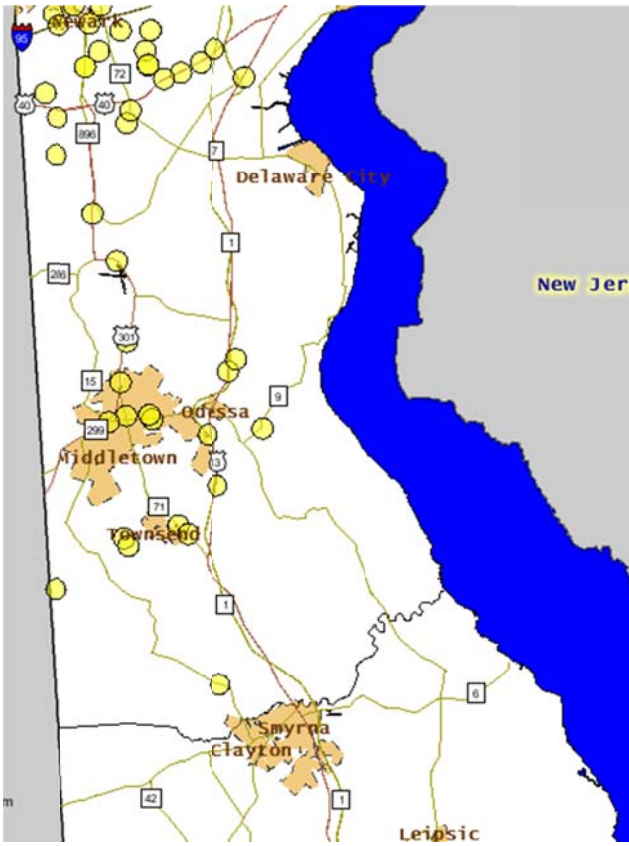

2009 11th Graders' Reports of Violence and Threats From Kids in the Neighborhood

Locations of Alcohol-related Motor Vehicle Accidents, 2009

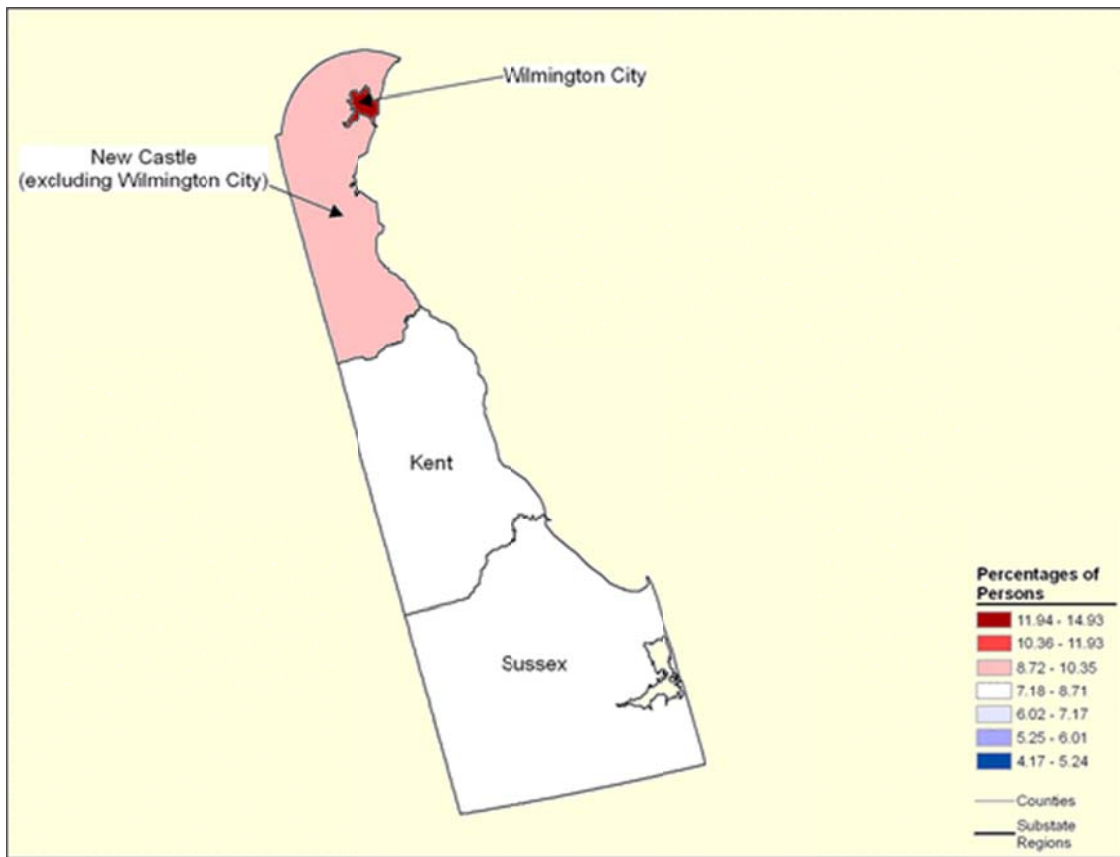

3. DELAWARE ADULT SURVEY DATA BY SUBSTATE PLANNING AREA

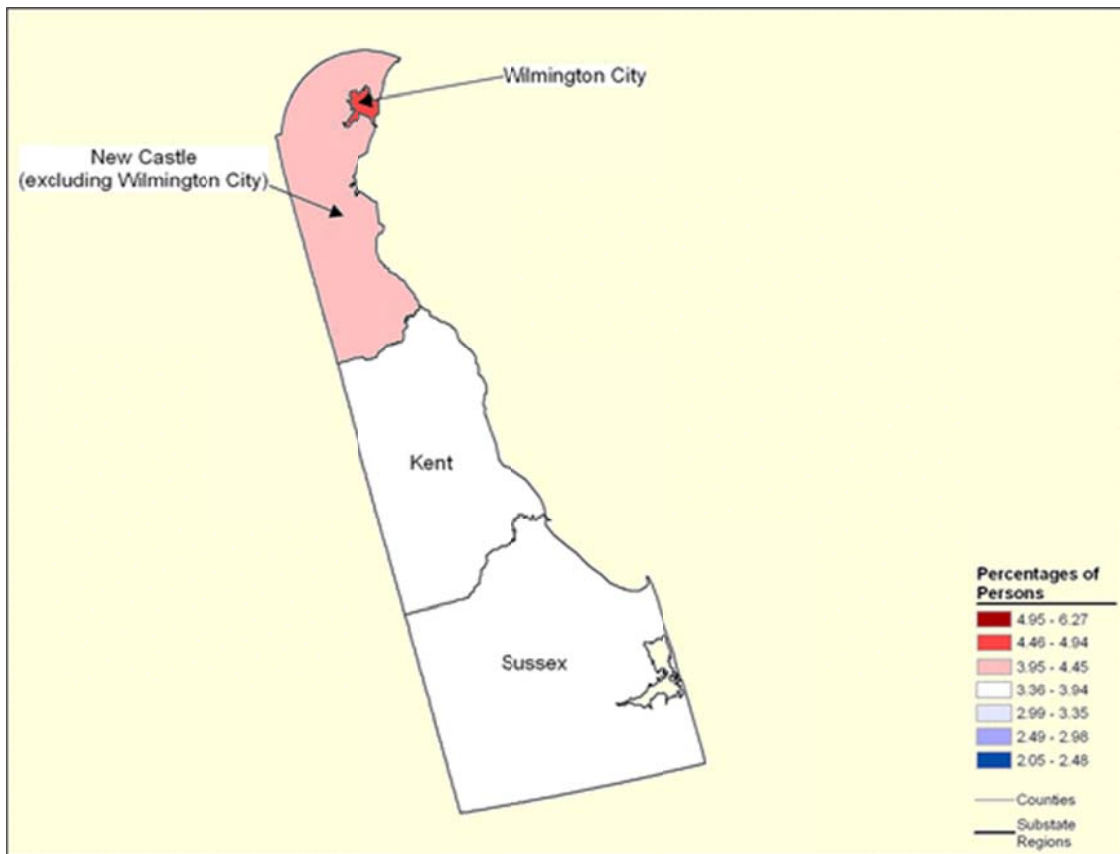

The following section includes tables and charts from the National Household Survey on Drug Use and Health and one page of tables from the Behavioral Risk Factor Surveillance System for Delaware. Each of these sources reports mostly on adults and provides limited data broken down by Substate Planning Area for Delaware. Additional information from these sources including all data available by substate planning area and all data available statewide are available online (see resources listed in Section 6 of this Profile below)

Prevalence Estimates for Sub-state Regions from the 2004-2006 National Survey of Drug Use and Health

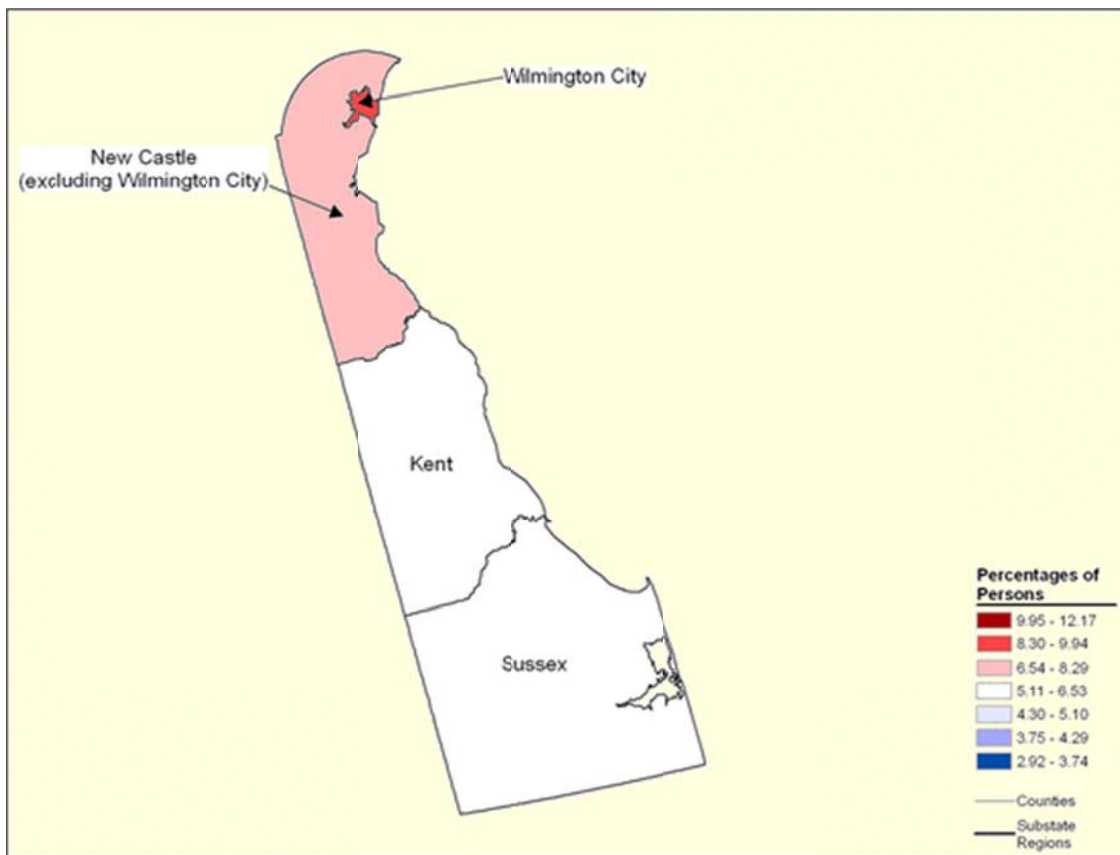

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Illicit Drug Use		
U.S.	8.14	7.93-8.35
Northeast U.S.	8.50	8.10-8.91
Southeast U.S.	7.34	7.07-7.63
Delaware	8.75	7.55 - 10.12
Kent County	7.50	5.77 - 9.69
New Castle County (Excluding Wilmington)	9.07	7.56 - 10.85
Sussex County	7.61	5.83 - 9.88
Wilmington	12.08	8.99 - 16.05

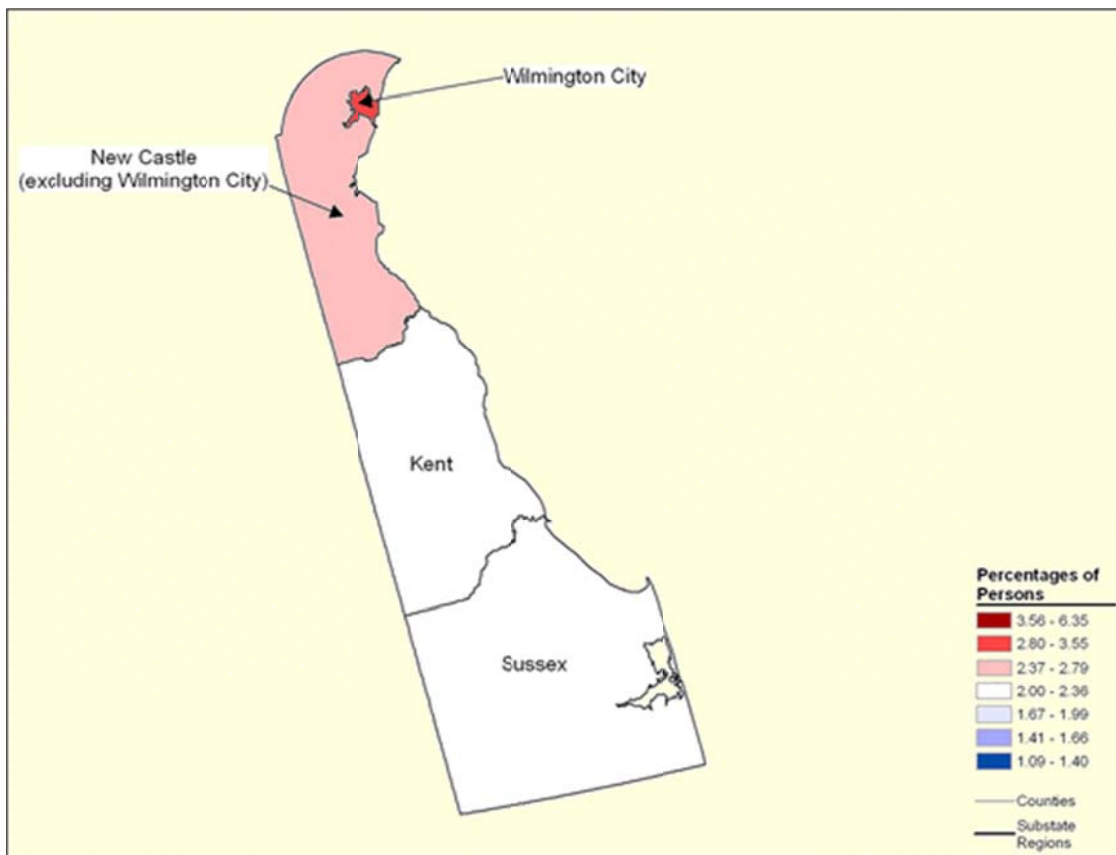

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Illicit Drug Use Other than Marijuana		
U.S.	3.71	3.58-3.86
Northeast U.S.	3.51	3.25-3.79
Southeast U.S.	3.71	3.51-3.92
Delaware	3.97	3.15-5.00
Kent County	3.92	2.79-5.48
New Castle County (Excluding Wilmington)	3.96	3.00-5.22
Sussex County	3.75	2.65-5.28
Wilmington	4.70	3.12-7.03

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Marijuana Drug Use		
U.S.	5.99	5.82-6.17
Northeast U.S.	6.51	6.21-6.83
South U.S.	5.20	4.98-5.44
Delaware	6.52	5.58-7.62
Kent County	5.40	4.03-7.20
New Castle County (Excluding Wilmington)	6.91	5.69-8.36
Sussex County	5.60	4.16-7.51
Wilmington	8.68	6.30-11.85

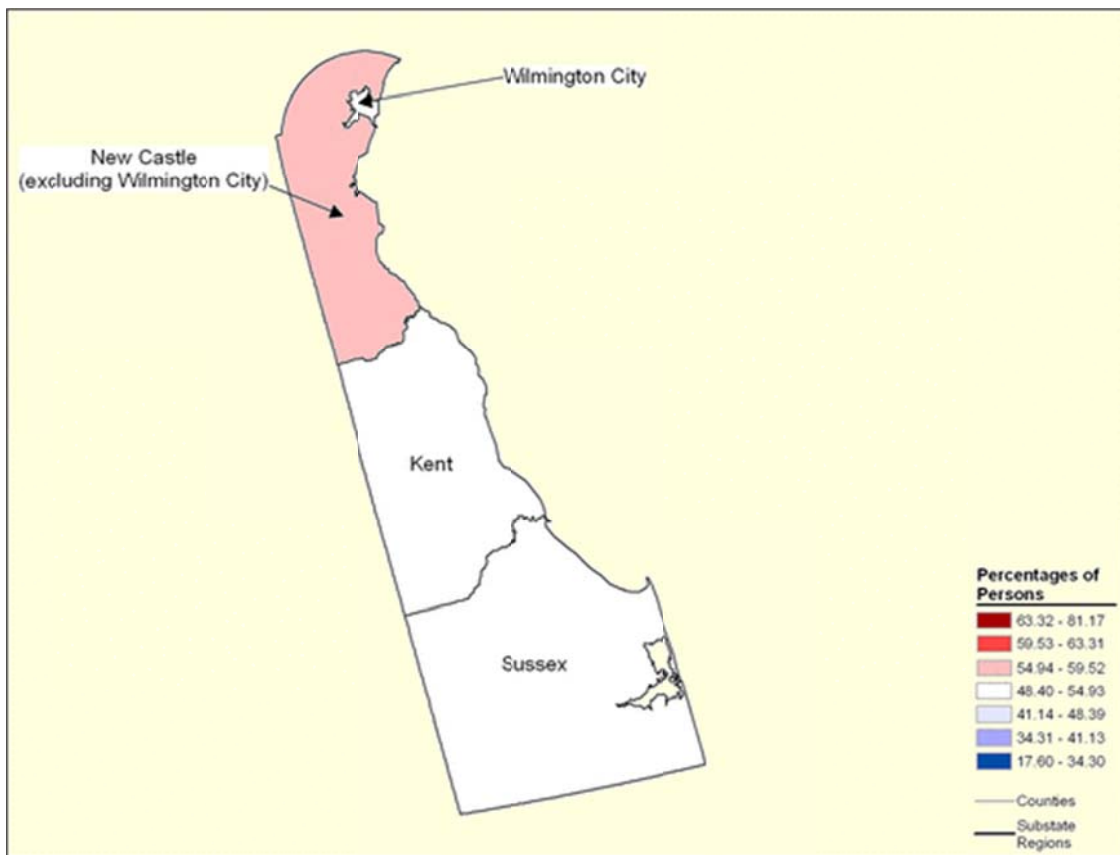

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Cocaine Use		
U.S.	2.32	2.21-2.43
Northeast U.S.	2.43	2.22-2.66
South U.S	2.23	2.07-2.39
Delaware	2.56	1.93-3.38
Kent County	2.27	1.49-3.44
New Castle County (Excluding Wilmington)	2.66	1.94-3.66
Sussex County	2.27	1.49-3.42
Wilmington	3.17	1.95-5.14

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Nonmedical Use of Pain Relievers		
U.S.	5.00	4.85-5.15
Northeast U.S.	4.26	3.98-4.55
South U.S.	5.01	4.79-5.25
Delaware	5.00	4.17-5.97
Kent County	5.14	3.92-6.71
New Castle County (Excluding Wilmington)	5.16	4.16-6.38
Sussex County	4.60	3.45-6.12
Wilmington	4.72	3.41-6.50

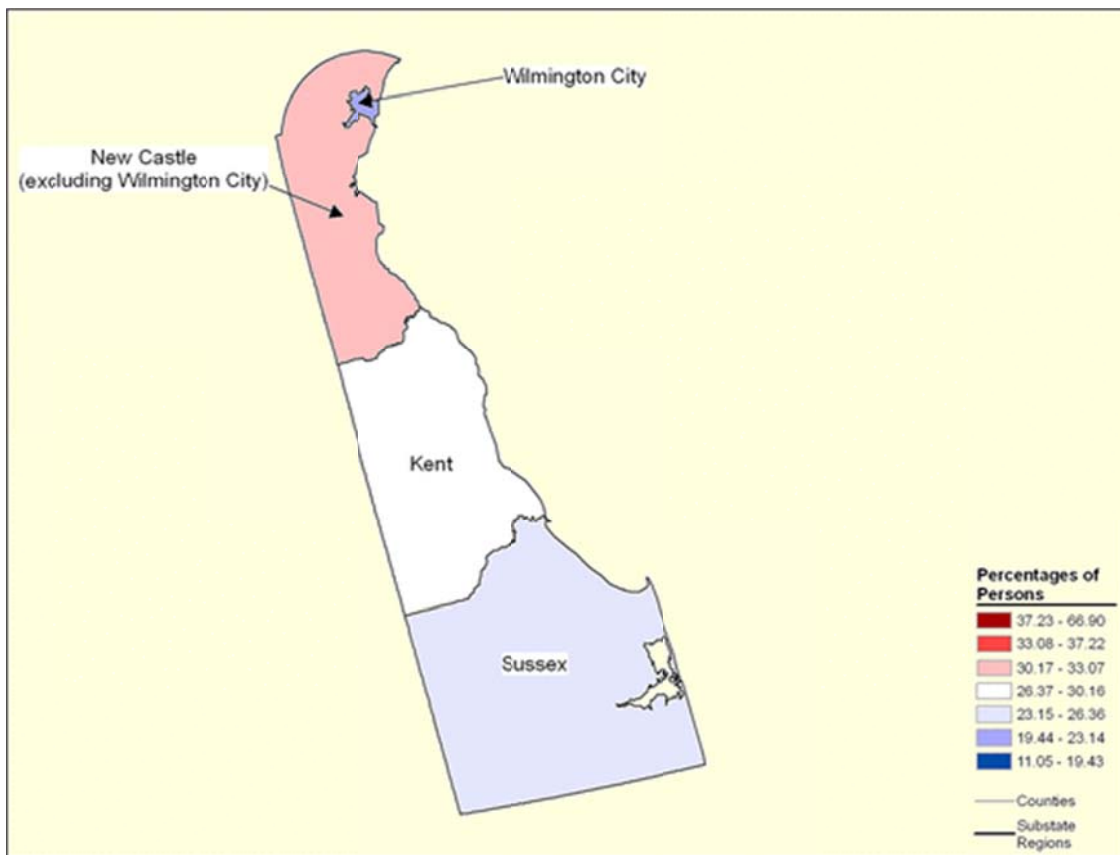

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Alcohol Use		
U.S.	51.23	50.76-51.71
Northeast U.S.	56.19	55.32-57.06
South U.S.	47.34	46.70-47.99
Delaware	54.85	52.14-57.54
Kent County	51.27	46.06-56.45
New Castle County (Excluding Wilmington)	59.00	55.23-62.67
Sussex County	50.27	45.23-55.31
Wilmington	48.67	42.09-55.30

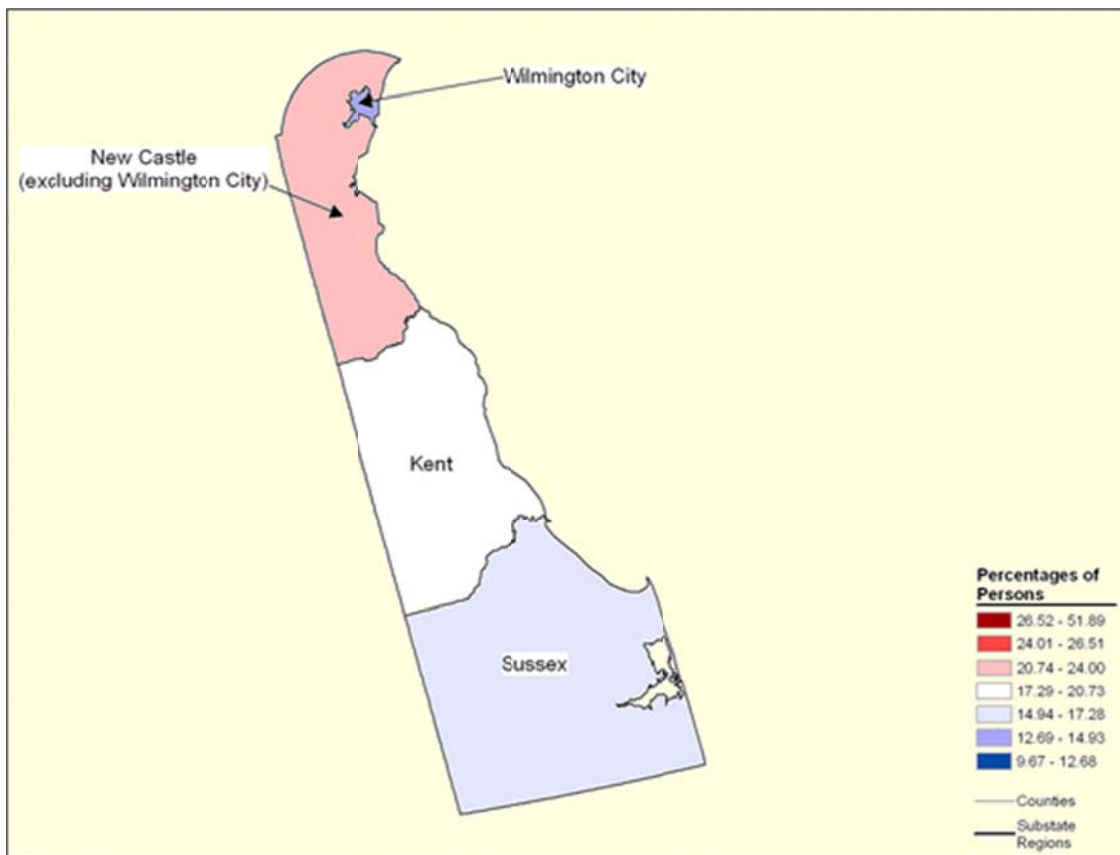

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Binge Alcohol Use		
U.S.	23.26	22.92-23.61
Northeast U.S.	24.20	23.50-24.92
South U.S.	21.92	21.41-22.43
Delaware	23.56	21.49-25.75
Kent County	23.04	19.63-26.85
New Castle County (Excluding Wilmington)	24.72	22.07-27.58
Sussex County	21.46	18.23-25.08
Wilmington	22.82	18.78-27.44

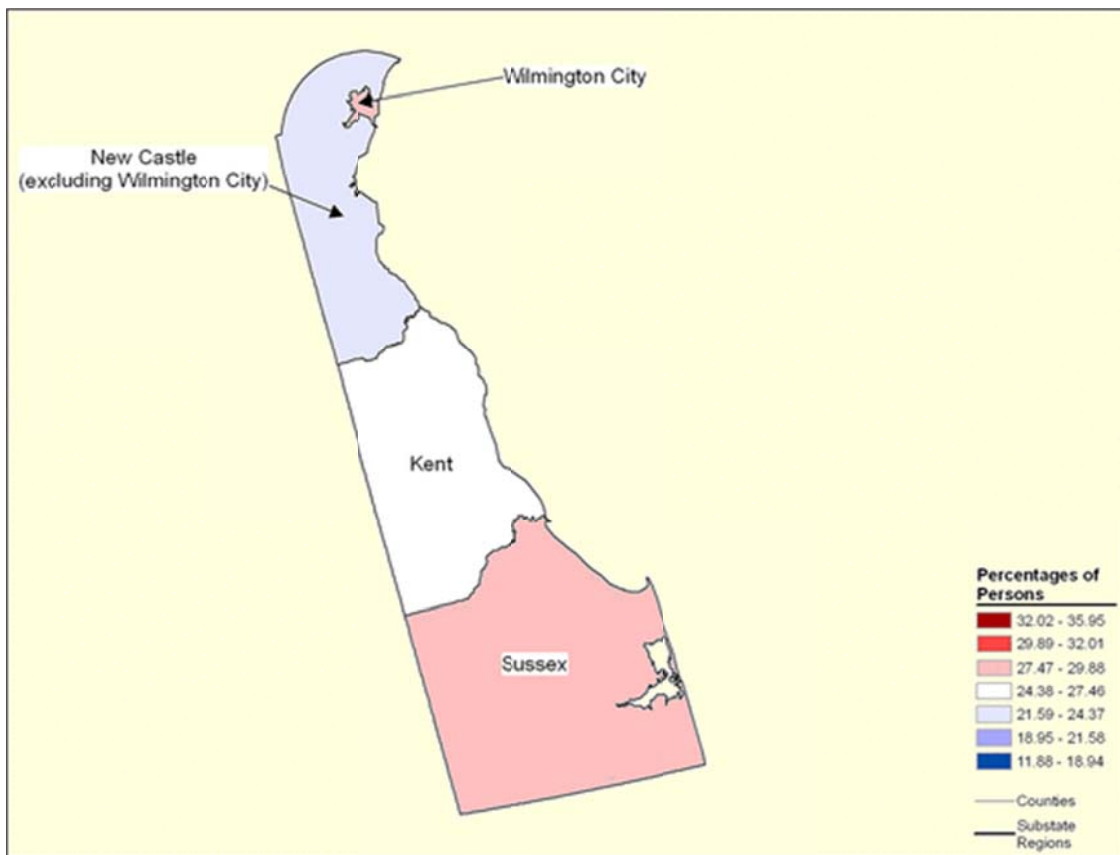

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Alcohol Use, Persons Aged 12-20		
U.S.	27.53	27.01-28.05
Northeast U.S.	31.04	30.27-31.83
South U.S.	25.47	24.93-26.01
Delaware	29.49	27.16-31.93
Kent County	29.13	25.19-33.41
New Castle County (Excluding Wilmington)	32.22	29.28-35.32
Sussex County	24.81	21.05-28.98
Wilmington	22.73	18.15-28.07

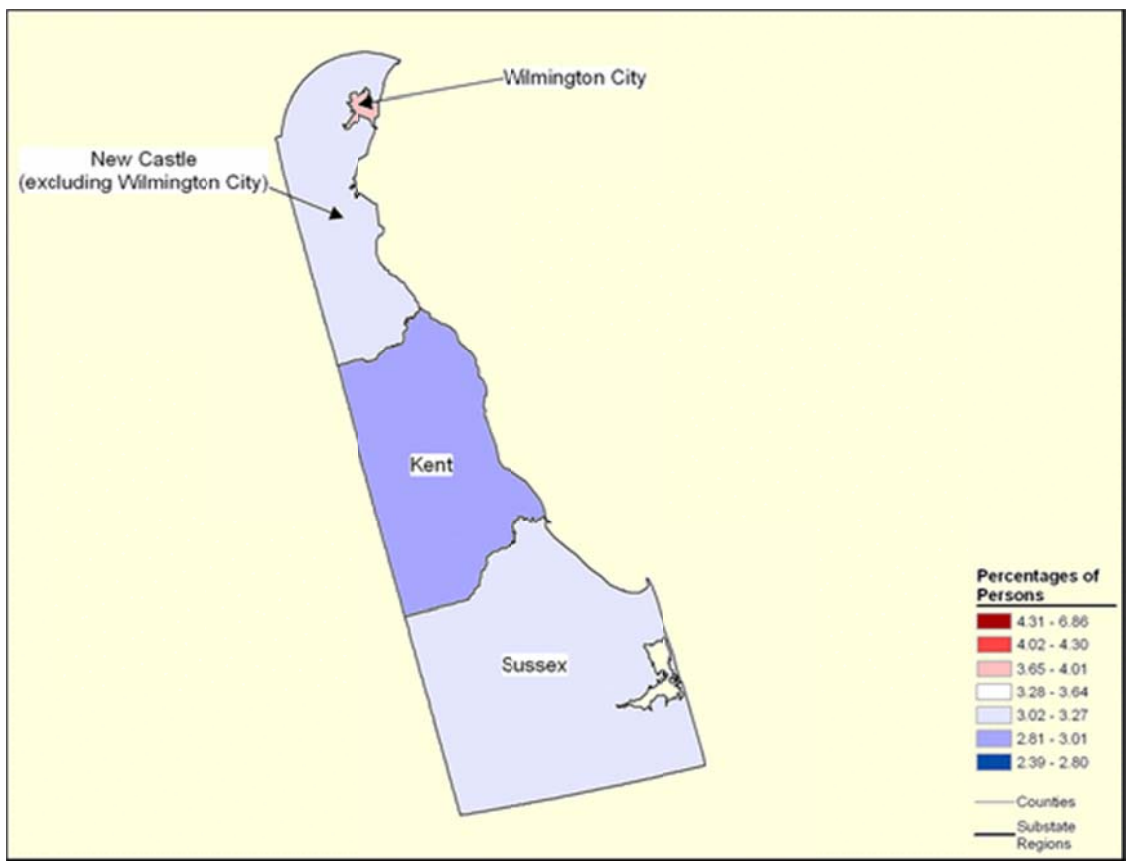

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Binge Alcohol Use, Persons Aged 12-20		
U.S.	18.31	17.88-18.75
Northeast U.S.	20.82	20.12-21.54
South U.S.	16.44	15.93-16.96
Delaware	20.08	18.01-22.33
Kent County	18.20	14.82-22.16
New Castle County (Excluding Wilmington)	22.86	20.11-25.86
Sussex County	17.10	13.72-21.11
Wilmington	12.87	9.69-16.90

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Month Cigarette Use		
U.S.	24.55	24.16-24.95
Northeast U.S.	22.81	22.13-23.49
South	26.02	25.48-26.58
Delaware	25.31	23.14-27.62
Kent County	26.43	22.89-30.30
New Castle County (Excluding Wilmington)	23.09	20.49-25.92
Sussex County	28.61	24.65-32.93
Wilmington	28.13	23.81-32.89

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Alcohol Dependence		
U.S.	3.47	3.34-3.61
Northeast U.S.	3.33	3.09-3.58
South U.S.	3.28	3.09-3.49
Delaware	3.17	2.57-3.92
Kent County	3.00	2.18-4.12
New Castle County (Excluding Wilmington)	3.19	2.43-4.17
Sussex County	3.02	2.18-4.15
Wilmington	3.79	2.66-5.38

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Illicit Drug Dependence		
U.S.	1.95	1.86-2.04
Northeast U.S.	1.98	1.81-2.16
South U.S.	1.92	1.80-2.06
Delaware	2.03	1.59-2.60
Kent County	2.37	1.59-3.51
New Castle County (Excluding Wilmington)	1.93	1.39-2.67
Sussex County	1.87	1.23-2.83
Wilmington	2.38	1.46-3.87

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Alcohol Dependence or Abuse		
U.S.	7.53	7.34-7.73
Northeast U.S.	7.12	6.76-7.49
South U.S.	6.96	6.68-7.24
Delaware	6.81	5.83-7.94
Kent County	6.33	4.97-8.04
New Castle County (Excluding Wilmington)	7.01	5.78-8.48
Sussex County	6.29	4.89-8.06
Wilmington	7.83	5.96-10.21

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Past Year Illicit Drug Dependence or Abuse		
U.S.	2.82	2.72-2.93
Northeast U.S.	2.80	2.61-3.01
South U.S.	2.86	2.70-3.02
Delaware	3.01	2.43-3.73
Kent County	3.28	2.32-4.62
New Castle County (Excluding Wilmington)	2.82	2.12-3.74
Sussex County	3.11	2.15-4.47
Wilmington	3.34	2.15-5.15

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Needing But Not Receiving Treatment for Alcohol in Past Year		
U.S.	7.16	6.98-7.35
Northeast U.S.	6.74	6.40-7.10
South U.S.	6.69	6.42-6.96
Delaware	6.40	5.46-7.50
Kent County	5.95	4.61-7.64
New Castle County (Excluding Wilmington)	6.70	5.51-8.13
Sussex County	5.79	4.43-7.54
Wilmington	7.03	5.26-9.35

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2006, 2007, and 2008 NSDUHs	Estimate	95% Prediction Interval
Needing But Not Receiving Treatment for Illicit Drug Use in Past Year		
U.S.	2.53	2.43-2.62
Northeast U.S.	2.44	2.27-2.62
South U.S.	2.56	2.41-2.71
Delaware	2.80	2.25-3.49
Kent County	3.24	2.25-4.65
New Castle County (Excluding Wilmington)	2.46	1.85-3.26
Sussex County	3.10	2.09-4.59
Wilmington	3.23	2.08-5.00

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2004, 2005, and 2006 NSDUHs	Estimate	95% Prediction Interval
Serious Psychological Distress in Past Year		
U.S.	11.54	11.24-11.84
Northeast U.S.	11.13	10.63-11.65
Delaware	10.97	9.64-12.46
Kent County	11.57	9.39-14.17
New Castle County (Excluding Wilmington)	10.58	8.96-12.46
Sussex County	10.71	8.62-13.23
Wilmington	12.80	10.17-15.98

Persons Aged 12 or Older in Delaware, by Substate Region: Percentages, Annual Averages Based on 2004, 2005, and 2006 NSDUHs	Estimate	95% Prediction Interval
Having at Least One Major Depressive Episode in Past Year		
U.S.	7.55	7.26-7.85
Northeast U.S.	7.40	6.90-7.93
Delaware	7.60	6.34-9.09
Kent County	7.21	5.47-9.44
New Castle County (Excluding Wilmington)	7.55	5.98-9.49
Sussex County	7.59	5.67-10.09
Wilmington	8.54	6.22-11.63

Statewide and Substate Estimates of Smoking, Binge Drinking, and HIV Risk for Delaware Adults

Adult Smoking Prevalence					
	Statewide	Wilmington	Suburban NC	Kent	Sussex
Smoke Every Day	13.4%	19.4%	11.3%	16.8%	16.4%
Smoke Some Days	4.4%	4.1%	4.1%	4.3%	4.7%
Former Smoker	28.5%	22.1%	28.4%	26.8%	31.2%

Acute or "Binge" Drinking [5+ Drinks at One Occasion]				
Statewide	Wilmington	Suburban N.C.	Kent	Sussex
17.9%	23.6%	19.8%	14.4%	14.9%

Respondents < Age 65 Who Have Ever Had an AIDS Test				
Statewide	Wilmington	Suburban N.C.	Kent	Sussex
46.0%	52.0%	42.4%	49.8%	43.1%

5. WILMINGTON SPECIFIC DATA (HOPE COMMISSION AND KIDS COUNT)

The following section includes some examples of the useful data from each of the Wilmington Hope Commission Report released in March 2006 and the Wilmington Kids Count Report for 2005. The Wilmington Hope Commission Data Report provides data on social, economic and criminal justice indicators specific to the City of Wilmington. It is meant to encourage planning and to be used to support programming initiatives such as this RFP. The Wilmington KIDS COUNT Fact Book is a snapshot of the well-being of children in Wilmington, Delaware using mostly information from 2004 and 2005. The tables and charts included here are indicative of the data available. Each Report is designed as a resource for policy makers and citizens to utilize in shaping local action to improve the status of children and families in Wilmington. Additional information from these sources including all data available by City and census tract is available online (see resources listed in Section 6 of this Profile below)

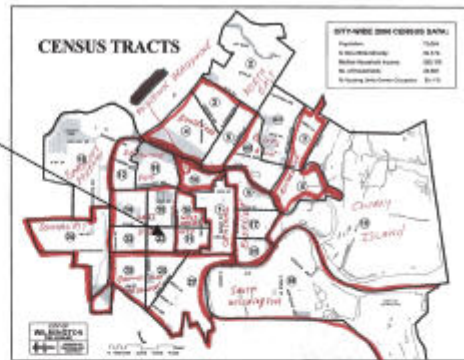

Department of Corrections Releases by Wilmington Zip Codes, January, 2005 through February, 2006.

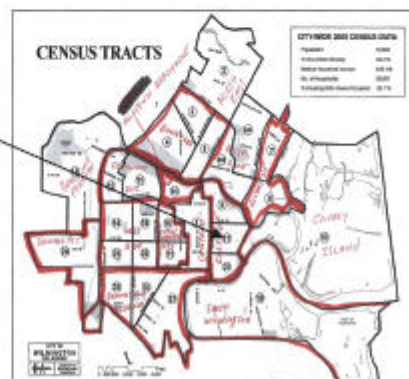

Social, Economic and Criminal Justice A Report of the Wilmington Hope Commission				
Data Affecting the City of Wilmington Garrison A., Final Report March 2006 Page 45-47				

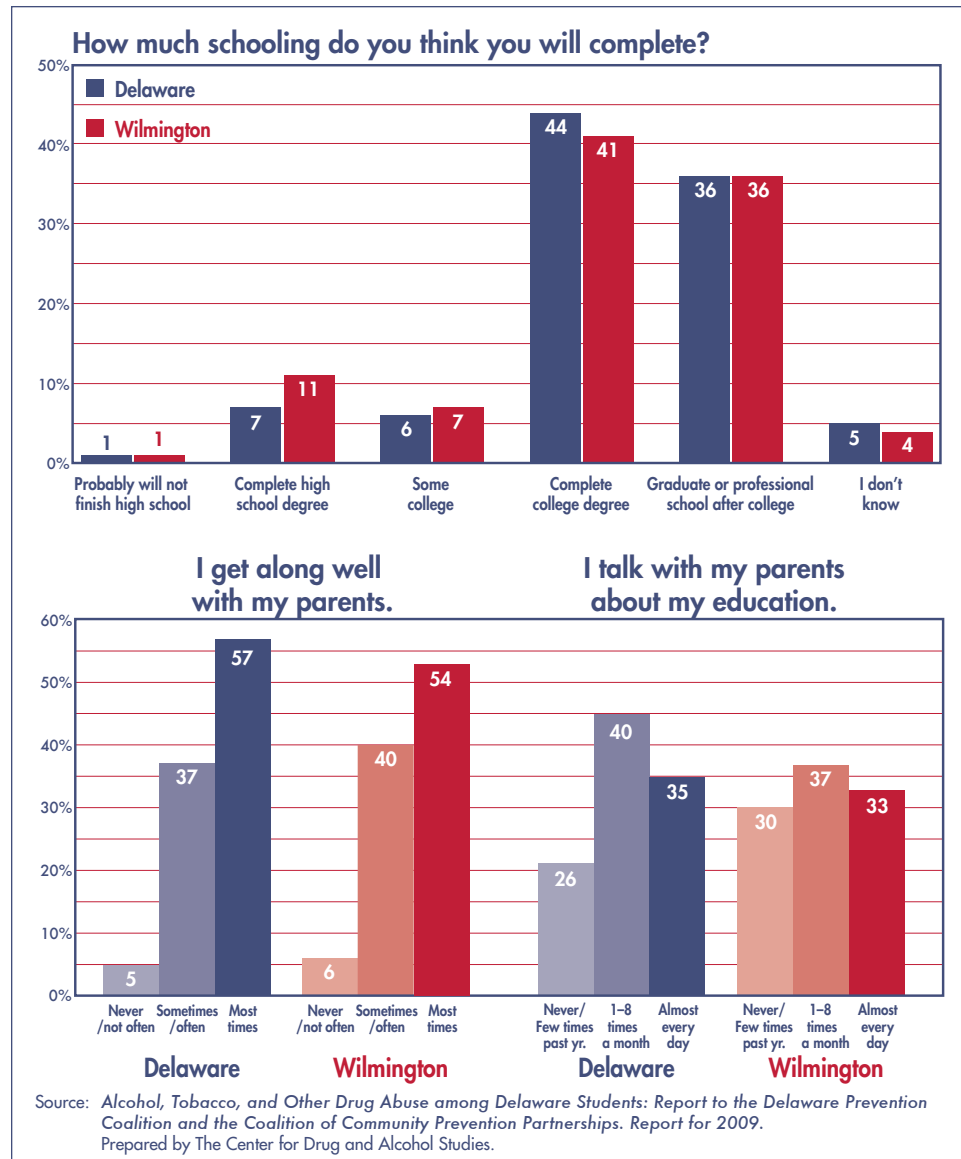

Each year since 1995, the Center for Drug and Alcohol Studies at the University of Delaware has administered a survey to public school students in the fifth, eighth, and eleventh grades about alcohol, tobacco, and drug use. The study is supported by the Office of Prevention, Department of Children, Youth and Their Families and is a cooperative partnering of the Department of Education and the Delaware Drug Free School Coordinators. It is a valuable tool in assessing trends of drug use among Delaware students. The Center for Drug and Alcohol Studies provided KIDS COUNT with 2009 data from students who lived in Wilmington zip codes 19801, 19802, 19805, and 19806. While caution should be used in interpreting data due to the small sample size of Wilmington students, it is useful to examine the issues in light of the increased interest in safety, parental involvement, substance abuse, educational needs, and future plans of Wilmington youth.

8th Graders

The survey included a sample of eighth graders who live in Wilmington (zip codes 19801, 19802, 19805, 19806).

8th Graders

When I'm not in school, my parent(s) know where I am

what I'm doing

I feel safe in my neighborhood.

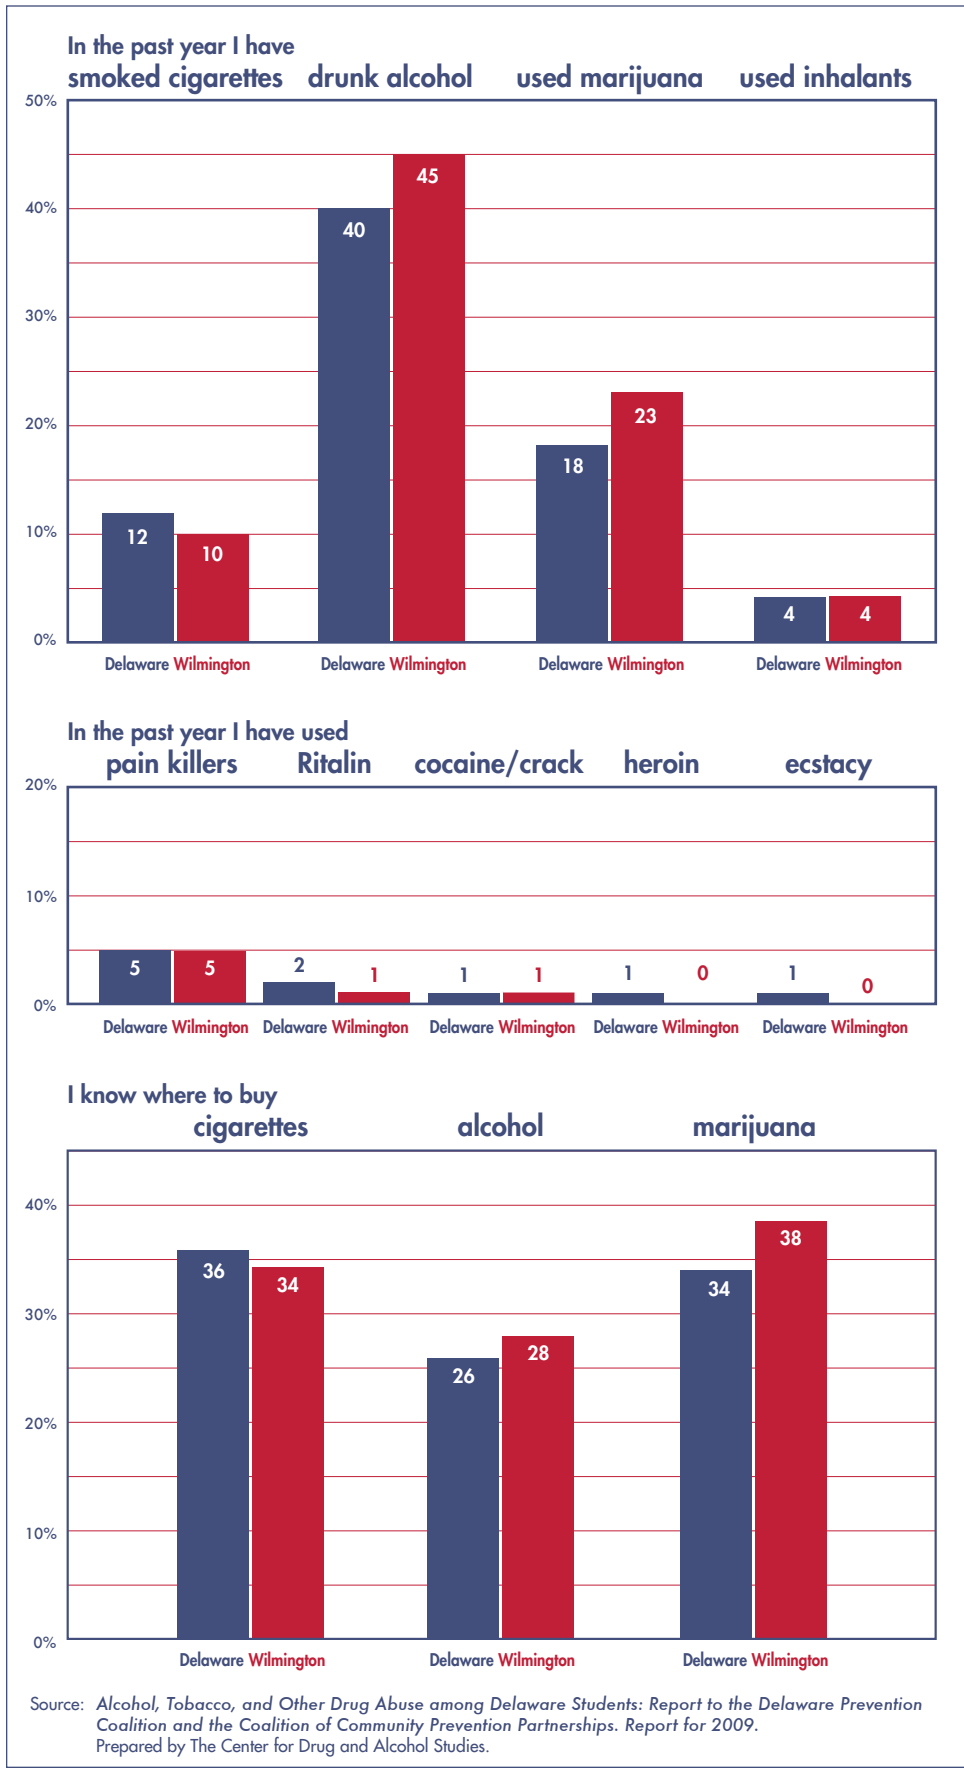

I feel safe in my school.

6. FULL ONLINE SOURCES FOR DATA IN THIS PROFILE AND ADDITIONAL DATA RESOURCES

An electronic copy of this Profile Report is available online at the Delaware Data Tracking Alliance (DDATA) website. The address for the 2010 Substate Profile Report is www.udel.edu/delawaredata/ssprofile2010.pdf

The full recent reports on Delaware Data for much of the material in these Profiles as well as many more resources are available online as well, as noted here.

*******SPECIFIC OTHER DATA RESOURCES*******

KIDS COUNT DELAWARE

KIDS COUNT in Delaware is one of fifty-one similar projects throughout the United States funded by The Annie E. Casey Foundation. The Project is located at the University of Delaware in the Center for Community Research and Service. The Group seeks to bring together the best available data to measure the health, economic, educational, and social well-being of children in Delaware. The overall web location for KIDS COUNT DE is <http://www.ccrs.udel.edu/kids-count>

Specific relevant reports are:

1.) The 2010 Kids Count/Families Count Fact Book is a comprehensive accounting of risk and protective factors. Some data are broken down by County and the City of Wilmington, but most of the data are statewide reports. <http://www.ccrs.udel.edu/KC2010>

2.) The 2005 Communities Count in Delaware Fact Book which provides extensive demographic information on Delaware by Census tract. It is largely based on the 2000 U.S. Census. <http://www.ccrs.udel.edu/communities-count-delaware-2005>

3.) The Wilmington KIDS COUNT Fact Book is a published report that monitors the status of children and families in the City of Wilmington, Delaware using the most current, reliable data collected from a variety of sources. The data are grouped into various featured indicators that describe a broad range of influences affecting the well-being of children. <http://www.ccrs.udel.edu/sites/ccrs.udel.edu/files/sites/udel.edu.ccrs/files/Wilmington%20Kids%20Count%20Fact%20Book%202009.pdf>

DELAWARE SCHOOL SURVEY RESULTS

Much of the data in this Substate Profiles Report come from the surveys done in the Delaware schools as part of the ongoing assessment of risk and protective factors for youth. These reports include:

1. The Delaware School Survey (DSS) that has been done in Delaware annually since 1989. Since 1999 the survey has expanded on the sample used in previous years and attempted to interview most 5th, 8th, and 11th graders in the Delaware public schools. The focus of the DSS is substance abuse and delinquency.
2. The Centers for Disease Control and Prevention (CDC) Youth Risk Behavior Survey (YRBS), which is administered in odd years since 1995 to a representative sample of high school students in Delaware. The YRBS focuses on a number of health and behavioral risk factors among youth.
3. The Youth Tobacco Survey (YTS) is also a CDC sponsored assessment focused on tobacco use, attitudes, and policies. It has been administered in even numbered years in Delaware since 2000.

Each of these surveys is conducted as an anonymous classroom administration, using a form that can be completed in no more than one class period. Classroom administrations are conducted by University of Delaware personnel, rather than by teachers, to reduce teacher burden and to help increase students' perceptions that the results were not seen by school personnel.

The full reports for the Delaware School Survey Results through 2009, the Youth Risk Behavior Study Report for Delaware through 2009, and the Delaware Youth Tobacco Survey through 2008 are all available on

the Delaware Data Tracking Alliance website
www.udel.edu/delawaredata/

DELAWARE ADULT SURVEY RESULTS

There are two more limited sources of current adult survey results broken down by substate planning areas for Delaware.

1. **The 2006-2008 SubState Report of Substance Use & Serious Psychological Distress** issued by the Office of Allied Studies in the Substance Abuse and Mental Health Services Administration. This report presents estimates of the prevalence of substance use or mental health problems in substate areas during 2006-2008 based on the National Survey on Drug Use and Health (NSDUH). NSDUH is an annual survey of the civilian, noninstitutionalized population aged 12 or older. This report presents estimates for 24 measures of substance use or mental health problems based on the 2006-2008 NSDUHs. The report can be found at:
<http://oas.samhsa.gov/substate2k10/toc.cfm>

2. **The 2007-2008 Behavioral Risk Factor Surveillance System report for selected health indicators in Delaware** is available from the Delaware Division of Public Health. The BRFSS is an annual survey of Delaware's adult population about behaviors which affect risk of disease and disability. The BRFSS is a joint effort of the Delaware Division of Public Health and the U.S. Centers for Disease Control and Prevention (CDC), and is funded by a CDC cooperative agreement. The random-sample telephone survey is conducted for the Division of Public Health by the Center for Applied Demography and Survey Research of the University of Delaware. Data from the survey are used by both public and private health providers to plan health programs and to track progress toward the state's health goals. The selected health indicators available by substate planning area can be accessed at:
http://dhss.delaware.gov/dhss/dph/dpc/wilmcountydata_2006-07.html

Other additional data for Delaware that are not specific to substate planning areas can be found from these two sources and an additional source as well.

- 1.) the National Survey of Drug Use and Health (NSDUH) state estimate data are available at <http://oas.samhsa.gov/states.cfm>
- 2.) The Behavioral Risk Factor Surveillance System (BRFSS) data for Delaware are available for a number of additional variables through the Delaware Division of Public Health. The complete data and can be accessed at <http://www.dhss.delaware.gov/dhss/dph/dpc/brfsurveys.html>
- 3.) For health related information for Delaware other than substance use, some information reported by state is available from the Centers for Disease Control and Prevention (CDC) at www.cdc.gov

WILMINGTON SPECIFIC INFORMATION

1. Although now somewhat dated, the Wilmington Hope Commission Report is a very comprehensive document providing data on indicators of social, economic and criminal justice data specific to Wilmington and related to impacting crime, violence, and other social problems in the City of Wilmington. It was published on March 16, 2006

<http://cjc.delaware.gov/PDF/Hope%20Data%20Report.pdf>

2. As noted earlier, the Wilmington KIDS COUNT Fact Book is a snapshot of the well-being of children in Wilmington, Delaware. Each report is designed as a resource for policy makers and citizens to utilize in shaping local action to improve the status of children and families in Wilmington.

The full report for Wilmington for 2009 is available online at

<http://www.ccrs.udel.edu/node/138>

OTHER LINKS TO STATE AND COUNTY LEVEL DATA

Other sources of state data are the websites of relevant State Departments and Divisions including the Delaware Department of Education, Department of Public Safety, Department of Services for Children Youth and Their Families, and the Department of Health and Social Services. All of these websites can be accessed through www.delaware.gov. The following links provide access to additional state and county-level data which can be used to help describe demographic variation in risk factors.

For Delaware Vital Statistics and other health-related information:
<http://www.dhss.delaware.gov/dhss/main/health.htm>

For Delaware school and district-related information:
www.doe.k12.de.us/ and particularly School Profile Reports at
