Total Laboratory Confirmed Cases of Seasonal Influenza: 1,422

Influenza A: 490
Influenza B: 283 **
Influenza A&B: 2
Influenza A-H1N1: 647*

Counts:
- New Castle – 693
- Kent – 398
- Sussex – 331

Age Range: 13 days – 94 yrs

Deaths: 1 reported in week 13

Hospitalization: Age range:
- 0-4 yrs -1
- 5-24 yrs – 7
- 65+ yrs – 1
* All hospitalized cases have been discharged*

Total Unconfirmed Cases: 154

Influenza Activity for Week 39: Widespread††

- No Activity: No laboratory-confirmed cases of influenza and no reported increase in the number of cases of ILI.
- Sporadic: Small numbers or isolated cases of laboratory-confirmed influenza cases or a single laboratory-confirmed influenza outbreak has been reported, but there is no increase in cases of ILI.
- Local: Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in a single region of the state.
- Regional: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least 2 but less than half the regions of the state. (This level of activity does not apply for small states with 4 or fewer regions.)
- Widespread: Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in at least half the regions of the state.

Please note: Data is preliminary and is subject to change as more reports are received.
** NOTE:

- DPH Laboratory ceased testing of Influenza B specimens May 3, 2009. The data provided above represents testing performed prior to May 3, 2009.

- Influenza A-H1N1: Represents total number of confirmed cases up to date. Despite reporting changes, data for H1N1 will not be reset until the 2009-2010 Influenza Season.

- During this week, influenza activity continued to increase in DE compared to the previous weeks. Visits to doctors for ILI are also increasing. Due to a combination of increasing ILI and Influenza cases, Delaware is now reporting WIDESPREAD influenza activity.

- This is the final report for the 2008-2009 influenza seasons. Beginning next week, all data will be reset to start the 2009-2010 season, which officially starts October 4, 2009.
ILI cases reported from Sentinel providers
4 of 12 sentinel providers reporting

Note: This data is current as of distribution date and is subject to change.
Starting with Week 16: Due to the H1N1 outbreak, ILI may be increased.
ILI cases reported from Corporations/LTCF
4 of 5* sites reporting
(*one organization that previously reported is no longer participating)

Note: This data is current as of distribution date and is subject to change
Starting with Week 16: Due to the H1N1 outbreak, ILI may be increased.
2008-2009 Influenza Seasons
Confirmed and Unconfirmed Seasonal Influenza

*NOTE: Confirmed cases: PCR (Polymerase Chain Reaction) positive or Influenza culture positive.
Unconfirmed cases: Rapid assay positive, not confirmed with PCR or culture.
