

Reported Pregnancy Highlights

Key Facts

- There were 14,409 reported pregnancies to Delaware residents in 2002: 11,083 live births, 65 fetal deaths, and 3,261 induced terminations (see technical notes for a description of reported pregnancies)¹. (See Table D-1).
- The five-year average (1998-2002) pregnancy rate for 15-17 year olds was lowest in Kent County, with 44.0 pregnancies per 1,000 females, followed by Sussex County, with a rate of 48.3, and New Castle county, with a rate of 50.5. (See Table D-5).
- The five-year average (1998-2002) pregnancy rate for 18-19 year olds was lowest in New Castle County (102 pregnancies per 1,000 females), and highest in Sussex County (145.7). (See Table D-5).
- Women of Hispanic origin had the lowest percentage of pregnancies (16.5%) that ended in induced termination in 2002. (see Table D-2).

1. Births and fetal deaths for Delaware residents are reported regardless of state of occurrence; induced terminations of pregnancy are reported for those that occur in Delaware only.

TABLE D-1

PRAGECTY

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of pregnancies within each area-age category.
3. Percentages for the age categories "<15" and "40+" may be misleading due to the small number of pregnancies in this category.

Notes:

PRACERAT

1. Reported pregnancies include live births, fetal deaths, and induced terminations of pregnancy.
2. For Delaware and counties, pregnancy rates represent the number of reported pregnancies to women of all ages per 1,000 women 15-44 years of age in the population.
3. For each age group, the denominator for the pregnancy rate is the total number women in the county/state within that age category except the "<15" and "40+" age categories which are based on women ages 10-14 and 40-49, respectively.
4. Comparisons using rates for the "<15" and "40+" age categories may be misleading due to the small number of events in these categories.

ABEDURAC

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of induced terminations of pregnancy in each race category.
3. Percentages for the race category "Other" may be misleading due to the small number of induced terminations of pregnancy in this category.
