Reported Pregnancy Highlights

Key Facts

- Of the 14,671 reported pregnancies to Delaware residents in 2004, 11,358 resulted in live births, 50 fetal deaths, and 3,263 induced terminations (see technical notes for a description of reported pregnancies)¹. (See *Table D-1*).
- The five-year average (2000-2004) pregnancy rate was 83.1 per 1000 women aged 15-44, which increased from 82.5 in 1999-2003 (*Table D-8*).
- The five-year average (2000-2004) pregnancy rate for 15-17 year olds was lowest in Kent County, with 37.0 pregnancies per 1,000 females, followed by Sussex County, with a rate of 41.4, and New Castle county, with a rate of 44.9. (See *Table D-8*). For each of the counties, the 2000-2004 rate was lower than its 1999-2003 rate.
- The five-year average (2000-2004) pregnancy rate for 18-19 year olds was lowest in New Castle County (103.9 pregnancies per 1,000 females), and highest in Sussex County (127.4). (See *Table D-8*).
- Women under 25 account for 55% of all induced terminations of pregnancy in Delaware.

1. Births and fetal deaths for Delaware residents are reported regardless of state of occurrence; induced terminations of pregnancy are reported for those that occur in Delaware only.

PRAGECTY

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of pregnancies within each area-age category.
3. Percentages for the age categories "<15" and "40+" may be misleading due to the small number of pregnancies in this category.

PRACERAT4

Notes:

1. Reported pregnancies include live births, fetal deaths, and induced terminations of pregnancy.
2. For Delaware and counties, pregnancy rates represent the number of reported pregnancies to women of all ages per 1,000 women 15-44 years of age in the population.
3. For each age group, the denominator for the pregnancy rate is the total number women in the county/state within that age category except the "<15" and "40+" age categories which are based on women ages 10-14 and 40-49, respectively.

PRACERAT6

Notes:

1. Reported pregnancies include live births, fetal deaths, and induced terminations of pregnancy.
2. For Delaware and counties, pregnancy rates represent the number of reported pregnancies to women of all ages per 1,000 women 15-44 years of age in the population.
3. For each age group, the denominator for the pregnancy rate is the total number women in the county/state within that age category except the "<15" and "40+" age categories which are based on women ages 10-14 and 40-49, respectively.
4. Comparisons using rates for the "<15" and "40+" age categories may be misleading due to the small number of events in these categories.

ABEDURAC

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of induced terminations of pregnancy in each race category.
3. Percentages for the race category "Other" may be misleading due to the small number of induced terminations of pregnancy in this category.
