Subject: Influenza Vaccine Supply

VFC Influenza Vaccine Supply

VFC influenza vaccine supply remains adequate in order to meet provider requests for vaccine. If you are in need of VFC influenza vaccine please continue to place orders.

Commercial Influenza Vaccine Supply

The Immunization Program has received information from vaccine manufacturers that several influenza products are sold out and the resupply is unknown.

If providers are in need of commercial influenza vaccine supply please contact a wholesaler or distributor (example: Cardinal, FFF Enterprises, McKesson, etc.). Doses of vaccine are still in the market.

Providers may refer commercial insurance patients to local pharmacies or a DPH facility for influenza vaccination.
